## UK GAAP (FRS 102) illustrative financial statements

For 2021 year ends

### Preface

This publication provides illustrative financial statements for the year ended 31 December 2021. These illustrative financial statements will assist you in preparing financial statements by illustrating the required disclosure and presentation for UK groups and UK companies reporting under FRS 102 'The Financial Reporting Standard, applicable in the UK and Republic of Ireland'.

#### **UK GAAP Group Limited**

This annual report illustrates the disclosures and format that might be expected for a company that prepares consolidated and separate financial statements in accordance with FRS 102 and the Companies Act 2006.

#### **UK GAAP Limited**

This annual report illustrates the disclosures and format that might be expected for a company preparing its financial statements under FRS 102 and the Companies Act 2006.

PricewaterhouseCoopers LLP London January 2022

Directors' report	10
Independent auditors' report to the members of UK GAAP Group Limited	16
Consolidated profit and loss account	19
Consolidated statement of comprehensive income	20
Consolidated and company balance sheet	21
Consolidated statement of changes in equity	24
Company statement of changes in equity	25
Consolidated statement of cash flows	26
Notes to the consolidated financial statements	28
UK GAAP Limited	81
Strategic report	82
Directors' report	84
Independent auditors' report to the members of UK GAAP Limited	89
Notes to the financial statements	99
Appendix: UK GAAP standards	134

### **UK GAAP Group Limited**

#### Year ended 31 December 2021

#### Example annual report under UK GAAP (FRS 102)

#### Introduction

The example annual report that follows includes the financial statements of UK GAAP Group Limited, a wholly-owned private group which prepares financial statements in accordance with FRS 102.

UK GAAP Group Limited is a fictitious company. Its annual report has been prepared for illustrative purposes only and shows the disclosures and formats that might be expected for a company that prepares its financial statements in accordance with the requirements of Part 15 of the Companies Act 2006 and 'The Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008' (SI 2008/410).

These financial statements also include voluntary disclosures that illustrate certain aspects of disclosure under FRS 102.

We have assumed that neither the entity nor the group it heads up qualify as small or medium sized under company law.

#### **Guidance and information**

References to source material are given in the left-hand margin. New disclosure requirements are shaded in pink. PwC commentary on matters of interest is shaded grey.

The intention is not to show all conceivable disclosures and this annual report should not, therefore, be used as a checklist. The suggested disclosures are not necessarily applicable for all private companies.

This illustrative annual report does not cover the following sections of FRS 102 (amongst other items):

- Government grants (Section 24)
- Impairment of assets (Section 27)
- Investment properties (Section 16)
- Long term contracts (Section 23)
- Hyper-inflation (Section 31)
- Specialised activities (Section 35)

At the time of writing, the biggest impact on the financial statements of entities all around the world continues to be related to the COVID-19 pandemic and the impairment of assets, including receivables, information about going concern and borrowing profiles will likely still be a focus of stakeholders as at 31 December 2021. Entities will need consider to what extent they need to explain the impact on their business and the key assumptions made. However, as the impact will differ from entity to entity, we are referring our readers to our dedicated web site which provides many useful resources, including certain disclosure examples, and continues to be updated to reflect latest developments. This website also discusses the accounting for COVID-19-related rent concessions by lessees. We have therefore not illustrated any related disclosures in this publication.

Our fact pattern further assumes that UK GAAP Group Plc will not be affected by interest rate benchmark reform. However, entities with hedging relationships and entities that have exposure to interest rates where (i) the interest rates are dependent on interbank offered rates (IBORs), and (ii) these IBORs are subject to interest rate benchmark reform may need to explain the changes to their accounting policies arising from the adoption of the Interest Rate Benchmark Reform – Phase 2 Amendments to FRS 102. These entities may also need to provide additional disclosures, including information about risks arising from IBOR reform, how the entity manages transition to the alternative benchmark rate(s) and details of any significant judgements or estimation uncertainty relating to IBOR reform. Our in-brief details the relevant considerations an entity should make 'Phase 2 amendments to FRS 102 – interest rate benchmark (IBOR) reform'. There were no other amendments to standards that apply from 1 January 2021 and we have therefore not disclosed any changes in accounting policies in this publication. However, if an entity did change its accounting policies as a result of the amendments made in relation to COVID-19-related rent concessions and IBOR Phase 2 and the change had a material impact on the reported amounts, this would need to be appropriately disclosed.

#### Disclosing climate-related risks in the financial statements

Climate-related risks could have a significant impact on an entity's operations and financial performance and users of the financial statements are increasingly looking for evidence that the entity has incorporated climate risk factors when making estimates and judgements in the preparation of financial statements. The accounting standards have an overarching requirement to disclose information that users need to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance. Therefore, in light of the current focus on, and impact of, climate change, entities should ensure that they have undertaken a rigorous assessment to provide all the material and relevant information affecting the financial statements.

The IASB has issued educational material which contains a non-exhaustive list of examples regarding how climate risk might affect the measurement and disclosure requirements of various standards and the various paragraphs of those standards that might be referenced in determining how to incorporate such risks. The material also discusses materiality and while it does not add or change the requirements in the standards, it is useful material that users and preparers might benefit from when preparing and assessing FRS 102 financial statements.

Our dedicated climate change web site provides useful industry specific information and links to guidance from standardsetters and other organisations.

Further guidance on the UK law and accounting requirements affecting companies' financial statements is contained in PwC's Manual of Accounting – UK GAAP.

PwC's Manual of Accounting – Narrative Reporting provides additional guidance on the requirements for strategic, corporate governance, remuneration and directors' reports.

### **UK GAAP Group Limited**

Annual Report for the year ended 31 December 2021

### Strategic report

CA06 s414A	The directors present their strategic report for the year ended 31 December 2021
CA06 s414A(3), 414C(13)	<ul> <li>Commentary The strategic report should be prepared on a consolidated basis. A summary of the FRC Guidance on the strategic report is included as an appendix to this section. This section reflects the strategic report requirements contained in section 414C of the Companies Act 2006 but it does not reflect the non-financial reporting requirements contained in section 414CB. Section 414CB applies to companies with more than 500 employees (or companies that head a group that has over 500 employees) where the company is: <ul> <li>a traded company;</li> <li>a banking company;</li> <li>a company carrying on insurance market activity.</li> </ul> Most companies reporting under FRS 102 will not meet the above criteria so they will not be required to comply with non-financial reporting requirements of section 414CB. FRS 102 reporters that are required to comply with those requirements should refer to the strategic report section of the IFRS for the UK illustrative financial statements.</li></ul>
CA06 s414C(2)	Review of the business         The report should include a review of the business containing:         • a fair review of the business of the company; and         • a description of the principal risks and uncertainties facing the company.
FRC Press Notice 108	<b>Commentary</b> Where non-GAAP numbers are disclosed, it should be clear that these differ from the GAAP numbers, the equivalent GAAP number should be disclosed, and there should be a reconciliation between the GAAP and non-GAAP numbers, together with relevant comment. This disclosure might be necessary to ensure that the annual report is fair, balanced and understandable. The information that is required to be included in the strategic report may be included elsewhere in the annual report and incorporated into the strategic report by cross– reference. We consider that this cross-referencing should be specific.
CA06 s414rC(3)	<ul> <li>The review is a balanced and comprehensive analysis of:</li> <li>the development and performance of the business of the group during the financial year; and</li> <li>the position of the group at the end of the year, consistent with the size and complexity of the business.</li> </ul>
CA06 s414C(4)	<ul> <li>The review must, to the extent necessary for an understanding of the development, performance or position of the business of the group, include:</li> <li>analysis using financial key performance indicators; and</li> <li>where appropriate, analysis using other key performance indicators, including information relating to environmental matters and employee matters.</li> </ul>

	General
CA06 s414C(11), SI 2008/410 7 Sch 1A	Where there are matters that are directors' report disclosure requirements but considered by the directors to be of strategic importance to the group, these should be included in the strategic report. (If this is the case, the directors' report includes a cross-reference to the relevant information in the strategic report.)
CA06 s414C(12)	The report must, where appropriate, include references to, and additional explanations of, amounts included in the financial statements of the company.
CA06 s414C(14)	The report need not disclose any information about impending developments or matters in the course of negotiation if, in the opinion of the directors, such disclosure would be seriously prejudicial to the interests of the company.
	Section 172(1) statement
CA06 s414CZA	A strategic report for a financial year of a company must include a statement (a 'section 172(1) statement') which describes how the directors have had regard to the matters set out in section 172(1)(a) to (f) when performing their duty under section 172.
	Commentary
	The section 172(1) statement does not apply if the company qualifies as medium-sized or smaller in relation to that financial year (see sections 465 to 467 of the Companies Act 2006). For groups, the thresholds are two or more of the following:
	• aggregate turnover – more than £36 million net (or £43.2 million gross);
	• aggregate balance sheet total – more than £18 million net (or £21.6 million gross); and
	• aggregate number of employees – more than 250.
CA06 s414D(1)	By order of the board W Jong Company Secretary 30 April 2022
	<b>Commentary</b> The strategic report has to be signed by the company secretary or a director after it has been approved by the board of directors. The copy of the strategic report that is delivered to the Registrar of Companies must be manually signed by the company secretary or a director.

### Appendix: Financial Reporting Council – Guidance on the Strategic Report

	Commentary
	In July 2018 the FRC published its revised Guidance on the Strategic Report. The revisions particularly relate to:
	<ul> <li>the connection between section 172 of the Companies Act 2006 ('the Act') and the purpose of the strategic report;</li> </ul>
	<ul> <li>changes arising from the UK implementation of the EU Non-Financial Reporting Directive; and</li> </ul>
	<ul> <li>a number of other recent developments and hot topics in reporting including, for instance, the incorporation of the ESMA Guidance on APMs.</li> </ul>
	The Guidance also takes account of the updated UK Code of Corporate Governance (2018), which applies for periods beginning on or after 1 January 2019.
	To clarify the relevant legal requirements, the content elements of the strategic report are discussed separately in the Guidance for: companies that are not Public Interest Entities: companies that are Public Interest Entities; and companies that are 'large' as per the Companies Act definition. The Guidance also includes a table of all the applicable requirements in GSR 2.7.
	The discussion below is not comprehensive and should be read in conjunction with the Guidance itself.
	The guidance serves as a best practice statement and, as such, has persuasive rather than mandatory force. One of the objectives is to set out high-level principles that enable entities to 'tell their story'. The Guidance is for directors and is intended to serve as best practice for all entities preparing strategic reports.
GSR Overview (x)	The purpose of the strategic report is to provide information for shareholders and help them to assess how the directors have performed their duty, under section 172, to promote the success of the company and, in doing so, have had regard to the matters set out in that section. This includes considering the interests of other stakeholders which will have an impact on the long-term success of the entity.
GSR Overview (xii)	The guidance recommends that information that is material to shareholders should be included in the strategic report. Immaterial information should be excluded as it can obscure the key messages and impair understandability.
	Section 2 Scope
GSR 2.1	The guidance is non-mandatory. It is intended to serve as best practice guidance for all entities preparing strategic reports.
GSR 2.3	The guidance continues to encourage consideration of both material content and non– financial information, irrespective of whether there is a statutory requirement to do so.
	Section 3 The annual report
	The purpose of the annual report
GSR 3.2	The purpose of the annual report is to provide shareholders with relevant information that is useful for making resource allocation decisions and assessing the directors' stewardship.

GSR 3.5	The annual report as a whole should be fair, balanced and understandable and should provide the information necessary for shareholders to assess the entity's performance, business model and strategy.
	Placement of information in the annual report
GSR 3.12	The placement of information within the annual report or elsewhere should facilitate the effective communication of that information.
GSR 3.17	Where information satisfying a disclosure requirement that applies to the strategic report is presented outside of that component, cross-referencing must be used in order for the disclosure requirement to be met. Cross-references should be clear and specific.
	Section 5 The strategic report: materiality
GSR 5.1	Information is material if its omission or misrepresentation could influence the economic decisions shareholders take on the basis of the annual report as a whole. Only information that is material in the context of the strategic report should be included in it. The inclusion of immaterial information can obscure key messages and impair the understandability of information provided in the strategic report. Immaterial information should be excluded from the strategic report.
GSR 5.12	The strategic report should focus on those matters that are material to an understanding of the development, performance, position or future prospects of the business. In the annual report of a parent company, for example, the strategic report should be a consolidated report and should include only those matters that are material in the context of the consolidated group.
GSR 5.13	The concept of materiality cannot, however, be applied to disclosures that are required by company law or its associated regulations unless explicitly allowed (for example, through the use of the terms 'to the extent necessary for an understanding of' or 'principal').
	Section 6 The strategic report – communication principles
GSR 6.2	The strategic report should be fair <sup>1</sup> , balanced <sup>2</sup> and understandable.
GSR 6.8	The strategic report should be comprehensive <sup>3</sup> but concise.
GSR 6.11	Where appropriate, information in the strategic report should have a forward-looking orientation.
GSR 6.15	The strategic report should provide information that is entity-specific.
GSR 6.17	The strategic report should highlight and explain linkages between pieces of information presented within the strategic report and in the annual report more broadly.
GSR 6.25	The structure and presentation of the strategic report should be reviewed annually to ensure that it continues to meet its objectives in an efficient and effective manner.
GSR 6.27	Content that has been brought forward from previous years should be reviewed to ensure that it has continuing relevance. Any information that is no longer necessary in meeting the objectives of the strategic report should be removed.
	Section 7 The strategic report: content elements
GSR 7B.11	The strategic report should include a description of the entity's strategy <sup>4</sup> .

<sup>&</sup>lt;sup>1</sup> CA06 s414C(2)(a).

<sup>&</sup>lt;sup>2</sup> CA06 s414C(3).

<sup>&</sup>lt;sup>3</sup> CA06 s414C(3).

<sup>&</sup>lt;sup>4</sup> CA06 s414C(8)(a).

GSR 7B.12	A description of the strategy for achieving an entity's objectives provides insight into its future development, performance, position and future prospects. The disclosure of the entity's objectives places the strategy in context and allows shareholders to make an assessment of its appropriateness.
GSR 7B.13	Where relevant, linkage to and discussion of key performance indicators (KPIs) should be included in any descriptions to allow an assessment of the entity's progress against its strategy and objectives. Similarly, emphasising the relationship between an entity's principal risks and its ability to meet its objectives may provide relevant information.
GSR 7B.14	The strategic report should include a description of the entity's business model <sup>5</sup> .
GSR 7B.16	A critical part of understanding an entity's business model is understanding its sources of value, being the key resources and relationships that support the generation and preservation of value. In identifying its key sources of value, an entity should consider both its tangible and intangible assets and also identify those resources and relationships that have not been reflected in the financial statements because they do not meet the accounting definitions of assets or the criteria for recognition as assets. This information may provide insight into how the board manages, sustains and develops these unrecognised assets.
GSR 7B.27	The strategic report should include a description of the principal risks and uncertainties facing the entity <sup>6</sup> , together with an explanation of how they are managed or mitigated.
GSR 7B.32	The descriptions of the principal risks and uncertainties should be specific so that a shareholder can understand why they are material to the entity. This might include a description of the likelihood of the risk, an indication of the circumstances under which the risk might be most relevant to the entity and its possible effects. An explanation of how the principal risks and uncertainties are managed or mitigated should also be included to enable shareholders to assess the impact on the future prospects of the entity.
GSR 7B.33	Significant changes in principal risks such as a change in likelihood, probable timing or possible effect, or the inclusion of new risks, should be highlighted and explained.
GSR 7B.35	To the extent necessary for an understanding of the development, performance or position and impact of an entity's activity, the strategic report must include information relating to, as a minimum:
	• environmental matters (including the impact of the entity's business on the environment);
	the entity's employees;
	social matters;
	respect for human rights; and
	To the extent necessary for an understanding of the development, performance or position of the entity's business, the strategic report must include information about community issues <sup>7</sup> .
GSR 7B. 59	The strategic report must provide a fair, balanced and comprehensive analysis of the development and performance of the business in the financial year and of its position at the end of that year. <sup>8</sup>
GSR 7B.66	The strategic report must, where appropriate, include references to, and additional explanations of, amounts included in the financial statements. <sup>9</sup>
GSR 7B.68	The analysis in the strategic report must include financial and non-financial key performance indicators (KPIs). <sup>10</sup>

<sup>5</sup> CA06 s414C(8)(b).

- <sup>6</sup> CA06 s414C(2)(b).
- <sup>7</sup> CA06 s414C(7)(b)(iii)
- <sup>8</sup> CA06 s414C(2)(a),(3)
- <sup>9</sup> CA06 s414C(12), s414CB(5)

<sup>10</sup> CA06 s414C(4), s414CB(2)(e)

GSR 7B.70	Non-financial KPIs provide insight into future financial prospects and progress in managing risks and opportunities. They may include, for example, measures related to product quality, customer complaints, environmental matters or employee metrics. Non– financial KPIs may be a mixture of indicators which provide information about what the entity has done in the past and what may happen in the future. They should include matters potentially affecting the long-term sustainability of the entity. Entities should also consider disclosing KPIs which measure the impact of the entity's activities.
GSR 7B.77	The strategic report should provide a breakdown showing, as at the end of the financial year <sup>11</sup> :
	<ul> <li>the number of persons of each sex who are directors of the company;</li> </ul>
	<ul> <li>the number of persons of each sex who were senior managers of the entity (other than persons falling within sub-paragraph (a)); and</li> </ul>
	<ul> <li>the number of persons of each sex who were employees of the entity.</li> </ul>
GSR 7B.85	To the extent that matters are considered to be of strategic importance to the entity, the strategic report should include information that would otherwise be disclosed in the directors' report <sup>12</sup> .

<sup>&</sup>lt;sup>11</sup> CA06 s414C(8)(c)

<sup>&</sup>lt;sup>12</sup> CA06 s414C(11)

## Directors' report

	Directors' report for the year ended 31 December 2021
CA06 s415(1)	The directors present their report and the audited financial statements of the group and company for the year ended 31 December 2021.
	Future developments
SI 2008/410 7 Sch 7(1)(d)	The directors' report should contain an indication of the likely future developments in the group's business.
	Commentary
	This disclosure is likely to be relevant to the strategic report. It could be included in the strategic report and incorporated into the directors' report by cross reference.
	Dividends
CA06 s416(3)	Details of dividends paid and recommended should be included.
	Political donations and political expenditure
SI 2008/410 7 Sch 3 <sup>2</sup> as amended by SI 2019/145	If the company has made any donations to a registered political party, other political organisation in the UK or any independent election candidate, or if it incurred UK political expenditure exceeding £2,000 in the financial year, the directors' report should disclose:
Revised requirement	<ul> <li>UK donations – the name of the political party and total amount given per party by the entity</li> </ul>
	• UK political expenditure – total amount incurred in the financial year by the company
SI 2008/410 7 Sch 4	Total contributions to non-UK political parties should be disclosed in aggregate. (There is no threshold for this disclosure.)
	Commentary
	Wholly-owned subsidiaries of companies incorporated in the UK are exempt from these disclosures.
SI 2019/145	Changes have been made to UK company law as it applies to corporate reporting in order to address issues arising from the UK's exit from the European Union. SI 2019/145 replaces several references to the EU or EEA with references to the UK. The impact of doing so includes a change to the disclosure of political contributions.
	Disclosures required in the directors' report in respect of contributions to non-EU political parties will be required in respect of non-UK political parties.
	The changes apply to financial years beginning on or after implementation period completion day (that is, 31 December 2020). For financial years that begin before, but end on or after, this day, the relevant UK law applies as if the UK continued to be a member State.
	Financial instruments
SI 2008/410 7 Sch 6	Where material for the assessment of the assets, liabilities, financial position and profit or loss of the group, the directors' report must contain an indication of:
	<ul> <li>the financial risk management objectives and policies of the entity, including the policy for hedging each major type of forecasted transaction for which hedge accounting is used; and</li> </ul>
	• the exposure of the entity to price risk, credit risk, liquidity risk and cash flow risk.

	Commentary
	This disclosure is not required where such information is not material for the assessment of the entity's assets, liabilities, financial position and profit or loss. In addition, an exemption from making these disclosures is available to small companies.
	Directors
CA06 s416(1)(a)	The names of all persons who were directors during any part of the period should be provided.
DV	Changes in directors since the end of the financial year and the dates of any appointments and/or resignations of directors occurring during the financial year should be provided.
DV	Information regarding the retirement of the directors at the AGM and whether they offer themselves for election should be disclosed.
	Qualifying third-party and pension scheme indemnity provisions
CA06 s236	If a qualifying third-party indemnity provision and/or qualifying pension scheme indemnity provision (whether made by the company or otherwise) has been in place for one or more directors of the company, the directors' report should state that fact. If the company has made such provisions for the benefit of the directors of an associated company, the directors' report should state that fact. These disclosures are required in respect of those provisions in force at any time during the financial year and those in force at the date of approval of the directors' report.
	Research and development
SI 2008/410 7 Sch 7(1)(a)	The directors' report should provide an indication of the company's research and development activities.
DV	It is recommended that a statement is included with regard to the charge to the income statement for the year (which should be separately disclosed in the notes to financial statements).
	Post balance sheet events
SI 2008/410 7 Sch 7(1)(c)	The directors' report should include particulars of any important events affecting the company or group since the year end.
	Commentary
	Similar to the disclosure on future developments, this disclosure is likely to fit well with the strategic report. It might therefore be appropriate to include therein and cross reference.
	Employees
SI 2008/410 7 Sch 10(3)	A statement should be included as to the UK policy for giving full and fair consideration to applications for employment that disabled people make to the company, the policy for employment, training, career development and promotion of disabled people and for the continuing employment and training of employees who have become disabled while employed by the company.
	Commentary
	This disclosure is required if the average number of employees during the year and working within the UK exceeds 250.
	Employee engagement statement
SI 2008/410 7 Sch 11 (as amended by SI 2018/860 Reg 13)	The directors' report must contain a statement: Describing the action that has been taken during the financial year to introduce, maintain or develop arrangements aimed at:

	<ul> <li>providing employees systematically with information on matters of concern to them as employees;</li> </ul>
	<ul> <li>consulting employees or their representatives on a regular basis so that the views of employees can be taken into account in making decisions which are likely to affect their interests;</li> </ul>
	<ul> <li>encouraging the involvement of employees in the company's performance through an employees' share scheme or by some other means; and</li> </ul>
	<ul> <li>achieving a common awareness on the part of all employees of the financial and economic factors affecting the performance of the company; and</li> </ul>
SI 2008/410 7 Sch 11	Summarising:
(as amended by SI 2018/860 Reg 13)	<ul> <li>how the directors have engaged with employees; and</li> </ul>
SI 2008/410 7 Sch 11B (as inserted by SI 2018/860 Reg 13)	<ul> <li>how the directors have had regard to employee interests, and the effect of that regard, including on the principal decisions taken by the company during the financial year.</li> </ul>
	Commentary
	This disclosure is required if the average number of employees during the year and working within the UK exceeds 250.
	Statement of engagement with suppliers, customers and others in a business relationship with the company
SI 2008/410 7 Sch 11B (as inserted by SI 2018/860 Reg 13)	The directors' report must contain a statement summarising how the directors have had regard to the need to foster the company's business relationships with suppliers, customers and others, and the effect of that regard, including on the principal decisions taken by the company during the financial year.
	Commentary
	These disclosures are applicable to a company that exceeds two of the following three thresholds (subject to smoothing arrangements where circumstances change):
	• £36 million turnover;
	£18 million total balance sheet assets; and
	250 employees.
	For groups, the thresholds are two or more of the following:
	<ul> <li>aggregate turnover – more than £36 million net (or £43.2 million gross);</li> </ul>
	• aggregate balance sheet total – more than £18 million net (or £21.6 million gross); and
	aggregate number of employees – more than 250.
	Branches outside the UK
SI 2008/410 7 Sch 7(1)(d)	The directors' report should disclose the existence of any branches that operate outside of the UK.
	Statement of corporate governance arrangements
SI 2008/410 7 Sch	The directors' report must include a statement setting out:
SI 2008/410 7 Sch 26(1)&(2) (as inserted by SI	<ul> <li>The directors' report must include a statement setting out:</li> <li>which corporate governance code, if any, the company applied in the financial year;</li> </ul>
26(1)&(2)	

If the company has not applied any corporate governance code for the financial year, the statement of corporate governance arrangements must explain the reasons for that decisions and explain what arrangements for corporate governance were applied for that year. Commentary This disclosure applies to all companies that satisfy either or both of the following conditions: more than 2,000 employees; and a turnover of more than £200 million, and a balance sheet of more than £2 billion A Coalition Group, appointed by BEIS, and with secretarial support from the FRC, has developed a set of principles for corporate governance reporting by large private companies ('Wates Principles'). These are not mandatory and companies are free to explain their own arrangements, as set out in the regulations above. The Wates Corporate Governance Principles for Large Private Companies Water Principles -A company that adopts the Wates Principles should follow them using an 'apply and explain' Introduction approach in a way that is most appropriate for their particular organisation. Accordingly, boards should apply each principle by considering them individually within the context of the company's specific circumstances. They should then be able to explain in their own words how they have addressed them in their governance practices. Wates Principle 1 Purpose and leadership: An effective board develops and promotes the purpose of a company, and ensures that its values, strategy and culture align with that purpose. Wates Principle 2 Board composition: Effective board composition requires an effective chair and a balance of skills, backgrounds, experience and knowledge, with individual directors having sufficient capacity to make a valuable contribution. The size of a board should be guided by the scale and complexity of the company. Wates Principle 3 Director responsibilities: The board and individual directors should have a clear understanding of their accountability and responsibilities. The board's policies and procedures should support effective decision-making and independent challenge. Wates Principle 4 Opportunity and risk: A board should promote the long-term sustainable success of the company by identifying opportunities to create and preserve value, and establishing oversight for the identification and mitigation of risks. Wates Principle 5 Remuneration: A board should promote executive remuneration structures aligned to the long-term sustainable success of a company, taking into account pay and conditions elsewhere in the company. Wates Principle 6 Stakeholder relationships and engagement: Directors should foster effective stakeholder relationships aligned to the company's purpose. The board is responsible for overseeing meaningful engagement with stakeholders, including the workforce, and having regard to their views when taking decisions. Statement of directors' responsibilities The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation. Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the group and the company financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland', and applicable law). Under company law, directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and company and of the profit or loss of the group for that period. In preparing the financial statements, the directors are required to:

	<ul> <li>select suitable accounting policies and then apply them consistently;</li> </ul>
	<ul> <li>state whether applicable United Kingdom Accounting Standards, comprising FRS 102 have been followed, subject to any material departures disclosed and explained in the financial statements;</li> </ul>
	<ul> <li>make judgements and accounting estimates that are reasonable and prudent; and</li> </ul>
	<ul> <li>prepare the financial statements on the going concern basis unless it is inappropriate to presume that the group and company will continue in business.</li> </ul>
	The directors are responsible for safeguarding the assets of the group and company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.
	The directors are also responsible for keeping adequate accounting records that are sufficient to show and explain the group's and company's transactions and disclose with reasonable accuracy at any time the financial position of the group and company and enable them to ensure that the financial statements comply with the Companies Act 2006.
	Directors' confirmations
CA06 s418(2)	In the case of each director in office at the date the directors' report is approved:
	<ul> <li>so far as the director is aware, there is no relevant audit information of which the group's and company's auditors are unaware; and</li> </ul>
	• they have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the group's and company's auditors are aware of that information.
	Independent auditors
DV (see also CA06 s489(1), (2))	The auditors, PricewaterhouseCoopers LLP, have indicated their willingness to continue in office and a resolution concerning their re-appointment will be proposed at the Annual General Meeting.
CA06 s419(1)	By order of the board
	W Jong Company secretary 30 April 2022
	Commentary
CA06 s419(1)	The directors' report must be signed by the company secretary or a director after it has been approved by the board of directors.
	The copy of the directors' report that is delivered to the Registrar of Companies must be manually signed by the company secretary or a director.
	Streamlined energy and carbon reporting ('SECR')
SI 2018/1155	Certain unquoted companies have environmental reporting requirements related to UK energy use.
	The disclosures should be presented in the directors' report. Where energy use is of strategic importance to the company, disclosure of the relevant information could be included in the strategic report instead of the directors' report. Appropriate cross referencing in the directors' report will need to be made.
	There are exemptions available for all entities where they have low energy use (less than 40 MWh annually) or when information would be seriously prejudicial or not practical to obtain.
	In September 2021 the FRC published a thematic review report on SECR disclosures which companies should refer to when preparing these disclosures and is available on the FRC website.

#### General climate change reporting

Another example of judgements that may need to be explained are judgements made by the entity about the possible impact of climate-related and other emerging business risks. Climate-related risks could have a significant impact on an entity's operations and financial performance and users of the financial statements are increasingly looking for evidence that the entity has incorporated climate risk factors when making estimates and judgements in the preparation financial statements. The accounting standards have an overarching requirement to disclose information that users need to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance. Therefore, in light of the current focus on, and impact of, climate change, entities should ensure that they have undertaken a rigorous assessment to provide all the relevant and material information affecting the financial statements.

### Independent auditors' report to the members of UK GAAP Group Limited

Warning: This audit report format was current at the date of going to print. However it may not be the most up-to-date version. It should not be used without checking that it is the most appropriate version and will need to be tailored to incorporate information appropriate to the group being audited.

#### Report on the audit of the financial statements

#### Opinion

In our opinion, UK GAAP Group Limited's group financial statements and company financial statements (the 'financial statements'):

- give a true and fair view of the state of the group's and of the company's affairs as at 31 December 2021 and of the group's profit and the group's cash flows for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland', and applicable law); and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report, which comprise: consolidated and company balance sheet as at 31 December 2021; consolidated profit and loss account and consolidated statement of comprehensive income, the consolidated statement of cash flows, and the consolidated and company statements of changes in equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (UK) ('ISAs (UK)') and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We remained independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

#### **Conclusions relating to going concern**

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group's and the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the group's and the company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

#### **Reporting on other information**

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic report and Directors' report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on our work undertaken in the course of the audit, the Companies Act 2006 requires us also to report certain opinions and matters as described below.

#### Strategic report and Directors' report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic report and Directors' report for the year ended 31 December 2021 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the group and company and their environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic report and Directors' report.

#### Responsibilities for the financial statements and the audit

#### Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the company or to cease operations, or have no realistic alternative but to do so.

#### Auditors' responsibilities for the audit of the financial statements

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the group and industry, we identified that the principal risks of non-compliance with laws and regulations related to [XXX – No illustration provided as this has to be group/company specific], and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the financial statements such as the Companies Act 2006. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to [YYY]. Audit procedures performed included:

• [ZZZ – No illustration provided as this has to be group/company specific]

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report

#### Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

#### Other required reporting

#### **Companies Act 2006 exception reporting**

- Under the Companies Act 2006 we are required to report to you if, in our opinion:we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns; or
- a corporate governance statement has not been prepared by the company.

We have no exceptions to report arising from this responsibility.

John Smith (Senior Statutory Auditor) for and on behalf of PricewaterhouseCoopers LLP Chartered Accountants and Statutory Auditors London

9.22	Non-controlling interests		3,472	3,955
			50,954	30,209

	Commentary			
5.2	An entity can present total comprehensive income under a single-statement or two statement approach:			
	• Under the single-statement approach, it presents a single statement of comprehensive income, including all its income and expense for the period.			
	• Under the two-statement approach, it presents an 'income statement' (alternatively known as a 'profit and loss account'), presenting all items of profit or loss, and a separate 'statement of comprehensive income', that begins with total profit or loss for the period and also presents all items of other comprehensive income.			
5.5, 5.7	Under both approaches, the profit and loss section should be presented in accordance with the formats in SI 2008/410.			
5.9B	FRS 102 does not require the disclosure of 'operating profit', but it emphasises that where an entity chooses to present the amount, it should ensure that all operating-type items are appropriately included and it would be inappropriate to exclude items clearly related to operations (such as inventory write-downs, profits or losses on the sale of property, plant and equipment, investment property and intangible assets, and restructuring and relocation expenses).			
5.5A(a)	Components of other comprehensive income can be presented either:			
	net of related tax effects; or			
	<ul> <li>gross of the related tax effects, with one amount showing the aggregate income tax relating to those components.</li> </ul>

#### Commentary

SI 2008/410 1 Sch 1A An entity is permitted to adapt the detailed company law profit and loss account and balance sheet formats set out in SI 2008/410. This is subject to the condition that the information given is at least equivalent to that which would have been required by the use of the detailed company law formats. SI 2008/410 also requires that the presentation is in accordance with generally accepted accounting principles or practice (for an FRS 102 reporter, in accordance with FRS 102). Under FRS 102, a company can choose to present under the detailed company law formats contained in SI 2008/410 or in accordance with IAS 1. A company that presents its profit and loss account in accordance with IAS 1 must in addition to the IAS 1 line items, present 'profit or loss before taxation'.

Differences between the company law formats and the IFRS-type formats might result from:

- The definition of fixed assets (company law) and non-current assets (IFRS).
- The definition of current assets.
- The definitions of creditors falling due within, or after, one year (company law) and current/non-current liabilities (IFRS).
- Presentation of debtors falling due after more than one year within current assets (company law). Under IFRS, those items would be presented in non-current assets.

These illustrative financial statements are presented under the detailed company law formats.

SI 2008/410 1 Sch 4 In the illustrative balance sheet above, certain items which are preceded by Arabic numbers in the Companies Act formats have been combined (for example, 'Tangible assets' or 'Creditors: amounts falling due within one year' lines), as doing so facilitates the assessment of the group's financial position and the individual amounts are disclosed in the notes. 'Postemployment benefits' and 'Provision for other liabilities' have not been combined, although they may be combined.

**CA06 s408** The company has elected to take the exemption under section 408 of the Companies Act 2006 from presenting the parent company profit and loss account. A company that takes the exemption from presenting the parent company profit and loss account is required to show the company's profit or loss for the year in its individual balance sheet. The law does not prescribe the way in which this information should be shown. A company could present the profit and loss for the year within the balance sheet itself by, for example, presenting as line items within the balance sheet both the brought– forward profit and loss reserve and the profit for the year, as illustrated here.

Alternatively, a company could show the profit for the year as a footnote to the balance sheet. Whichever method is used, the profit and loss for the year must be shown on the face of the balance sheet. It is not acceptable to give the disclosure in the notes only.

.15	Interest paid		(4,642)	(5,070)
7.6(a)	Proceeds from issue of ordinary share capital (net of costs of issue)	5	-	10,903
7.6(a)	Exercise proceeds from share-based payments		27	20
′.6(a)	Treasury shares acquired		(588)	_
	Net cash used in financing activities		(25,064)	(24,882)
7.20	Net increase in cash and cash equivalents		1,552	9,441
7.20	Cash and cash equivalents at the beginning of the year		11,339	2,723

Exchange losses on cash and cash equivalents	(562)	(825)
Cash and cash equivalents at the end of the year	12,329	11,339
Cash and cash equivalents consist of:		
Cash at bank and in hand	9,891	8,209
Short term deposits (included in current asset investments)	2,438	3,130
Cash and cash equivalents	12,329	11,339

**1.12(b)** The company is a qualifying entity for the purposes of FRS 102 and has elected to take the exemption under paragraph 1.12(b) of FRS 102 not to present the company statement of cash flows.

	Commentary				
7.7, 7.8	An entity can present cash flows from operating activities using either:				
	• the indirect method, where profit or loss is adjusted for the effects of changes during the period to working capital balances, non-cash transactions and items of income or expense associated with investing or financing cash flows; or				
	<ul> <li>the direct method, where major classes of gross cash receipts and payments are disclosed.</li> </ul>				
7.20	FRS 102 requires the statement of cash flows should include information about the changes in 'Cash and cash equivalents', whereas the balance sheet includes an item for 'Cash at bank and in hand'. Where these amounts differ, an entity should present the components of cash and cash equivalents and a reconciliation of the amounts to the equivalent items presented in the balance sheet.				

## Notes to the consolidated financial statements

	Commentary					
SI 2008/410 1 sch 42(2)	SI 2008/410 requires that notes are presented in the order in which, where relevant, the items to which they relate are presented in the balance sheet and in the profit and loss account.					
	1. General information					
3.24	UK GAAP Group Limited ('the company') and its subsidiaries (together 'the group') operate a number of large department stores throughout the UK and in several major European cities. The group operates with a number of recognised brand names and also has a number of branded e-commerce operations.					
3.24(a)	The company is a private company limited by shares and is incorporated in England. The address of its registered office is Higgs Mews, Moseley Way, Howtown.					
	2. Statement of compliance					
3.3	The group and individual financial statements of UK GAAP Group Limited have been prepared in compliance with United Kingdom Accounting Standards, including Financial Reporting Standard 102, 'The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland' ('FRS 102') and the Companies Act 2006.					
	3. Summary of significant accounting policies					
2.11, 8.5, 9.23(a), 10.7	The principal accounting policies applied in the preparation of these consolidated and separate financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.					
	a. Basis of preparation					
2.5, 3.8	These consolidated and separate financial statements are prepared on a going concern basis, under the historical cost convention, as modified by the recognition of certain financial assets and liabilities measured at fair value.					
8.7	The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group and company accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 4.					
CA06 s408(4)	The company has taken advantage of the exemption in section 408 of the Companies Act from presenting its individual profit and loss account.					
	Commentary					
9.1, 9.24	See the glossary to FRS 102 for definitions of consolidated and separate financial statements. Consolidated financial statements are referred to as 'group accounts' in the Companies Act 2006 and separate financial statements are included within the meaning of 'individual financial statements'.					
3.10	FRS 102 requires financial statements to be prepared annually. Where the reporting period changes and annual financial statements are presented for a period longer or shorter than one year the entity shall disclose (a) that fact; (b) the reason for using a					
	longer or shorter period; and (c) the fact that the comparative amounts presented in the financial statements are not directly comparable.					
	FRS 102 requires the entity to retain the presentation and classification of items from one period to the next unless (a) it is apparent, following a significant change in the entity's					

	operations, that another presentation or classification would be more appropriate or (b) FRS 102, or another applicable FRS or FRC Abstract, requires a change in presentation.
3.11–3.13	When presentation or classification is changed comparative amounts shall be reclassified unless impracticable. When amounts are reclassified the entity shall disclose (a) the nature of the reclassification; (b) the amount of each item or class of items that is reclassified; and (c) the reason for the reclassification. If reclassification is impracticable the entity shall disclose the reason why.
3.14	FRS 102 requires comparative information for all amounts in the financial statements unless the standard permits or requires otherwise. Comparative information for narrative and descriptive information should be included when it is relevant for an understanding of the current period's financial performance.
	b. Going concern
3.9, 32.7A, 32.7B	The group meets its day-to-day working capital requirements through its bank facilities. The current economic conditions continue to create uncertainty over (a) the level of demand for the group's products; and (b) the availability of bank finance for the foreseeable future. The group's forecasts and projections, taking account of a severe but plausible change in trading performance, show that the group should be able to operate within the level of its current facilities. After making enquiries, the directors have a reasonable expectation that the group has adequate resources to continue in operational existence for the foreseeable future. The group therefore continues to adopt the going concern basis in preparing its financial statements.
	Commentary
3.8	FRS 102 paragraph 3.8 requires financial statements to be prepared on a going concern basis but does not require an explicit statement. The Companies Act 2006 presumes that a group or company is carrying on business as a going concern.
3.9	FRS 102 requires management to make an assessment of the entity's ability to continue as a going concern taking into account all available information about the future, which is at least, but not limited to, twelve months from the date when the financial statements are authorised for issue. If there are material uncertainties that cast significant doubt upon the entity's ability to continue as a going concern, the entity shall disclose these uncertainties.
3.9	When an entity does not prepare financial statements on a going concern basis, it shall disclose that fact, together with the basis on which it prepared the financial statements and the reason why the entity is not regarded as a going concern.
	These illustrative financial statements include disclosures explaining that management consider the entity to be a going concern but this disclosure is not required by FRS 102 or the law.
	The pervasive impacts of COVID-19 may result in some entities having material uncertainties over going concern. In such cases, relevant disclosures should be made in the financial statements. When management concludes that there are no material uncertainties, disclosure would be required in the financial statements to the extent that there is more judgment around the use of the going concern assumption and consideration of whether there is a material uncertainty. As noted in the introductory notes, these illustrative financial statements do not provide any illustrative examples or guidance on the impact of COVID-19 on the financial statements including going concern. Instead, readers can refer to our dedicated web site which provides many useful resources and is constantly updated to reflect latest developments.
	c. Exemptions for qualifying entities under FRS 102
1.11	FRS 102 allows a qualifying entity certain disclosure exemptions, subject to conditions.
	The company has taken advantage of the following exemptions in its individual financial statements:

1.12(b)	<ul> <li>from preparing a statement of cash flows, on the basis that it is a qualifying entity and the consolidated statement of cash flows, included in these financial statements, includes the company's cash flows;</li> </ul>
1.12(c)	<ul> <li>from the financial instrument disclosures, required under FRS 102 paragraphs, 11.42, 11.44, 11.45, 11.47, 11.48(a)(iii), 11.48(a)(iv), 11.48(b), 11.48(c), 12.26, 12.27, 12.29(a), 12.29(b) and 12.29A, as the information is provided in the consolidated financial statement disclosures;</li> </ul>
1.12(d)(ii)	• from disclosing share-based payment arrangements, required under FRS 102 paragraphs 26.18(b), 26.19 to 26.21 and 26.23, concerning its own equity instruments, as the company financial statements are presented with the consolidated financial statements and the relevant disclosures are included therein; and
1.12(e)	• from disclosing the company key management personnel compensation, as required by FRS 102 paragraph 33.7.
	d. Basis of consolidation
9.2, 9.16, 9.23(a),(c)	The group consolidated financial statements include the financial statements of the company and all of its subsidiary undertakings together with the group's share of the results of associates made up to 31 December.
9.4, 9.5, 9.23(b)	A subsidiary is an entity controlled by the group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Where the group owns less than 50% of the voting powers of an entity but controls the entity by virtue of an agreement with other investors which give it control of the financial and operating policies of the entity, it accounts for that entity as a subsidiary.
9.17	Where a subsidiary has different accounting policies to the group, adjustments are made to those subsidiary financial statements to apply the group's accounting policies when preparing the consolidated financial statements.
14.2–14.4, 14.8, 14.12(a)	An associate is an entity, being neither a subsidiary nor a joint venture, in which the group holds a long-term interest and where the group has significant influence. The group considers that it has significant influence where it has the power to participate in the financial and operating decisions of the associate. The results of associates are accounted for using the equity method of accounting.
9.18, 14.8(i)	Any subsidiary undertakings or associates sold or acquired during the year are included up to, or from, the dates of change of control or change of significant influence respectively.
9.18A, 9.18B	Where control of a subsidiary is lost, the gain or loss is recognised in the consolidated income statement. The cumulative amounts of any exchange differences on translation, recognised in equity, are not included in the gain or loss on disposal and are transferred to retained earnings. The gain or loss also includes amounts included in other comprehensive income that are required to be reclassified to profit or loss but excludes those amounts that are not required to be reclassified.
9.19B–9.19D, 22.19	Where control of a subsidiary is achieved in stages, the initial acquisition that gave the group control is accounted for as a business combination. Thereafter where the group increases its controlling interest in the subsidiary the transaction is treated as a transaction between equity holders. Any difference between the fair value of the
	consideration paid and the carrying amount of the non-controlling interest acquired is recognised directly in equity. No changes are made to the carrying value of assets, liabilities or provisions for contingent liabilities.
9.10, 9.11, 9.33–9.37	Where the group has established employee benefit trusts ('EBT') or employee share ownership plans ('ESOP') and is the sponsoring entity, notwithstanding the legal duties of the trustees, the group considers that it has 'de facto' control of such entities. Such arrangements are accounted for as assets and liabilities of the sponsoring company and included in the consolidated financial statements as appropriate. The company's equity instruments held by the EBT or ESOP are accounted for as if they were the company's own equity and are treated as treasury shares. No gain or loss is recognised in profit or loss or

	other comprehensive income on the purchase, sale or cancellation of the company's own equity held by either the EBT or ESOP.
9.15, 14.8(e)	All intra-group transactions, balances, income and expenses are eliminated on consolidation. Adjustments are made to eliminate the profit or loss arising on transactions with associates to the extent of the group's interest in the entity.
	Commentary
9.2	Unless exempted under FRS 102 paragraph 9.3, a parent entity shall present consolidated financial statements in which it consolidates all its investments in subsidiaries in accordance with FRS 102. A parent entity need only prepare consolidated financial statements if it is a parent at the year-end.
9.5, 9.6, 9.6A	Control is presumed to exist when an entity owns, directly or indirectly through subsidiaries, more than half of the voting power. This presumption may be overcome, in exceptional circumstances, if it can be clearly demonstrated that such ownership does not constitute control. Control also exists when the parent owns less than half of the voting power and certain circumstances apply. In addition control can be achieved by having, currently exercisable, options or convertible instruments or through dominant influence.
9.8–9.9B	FRS 102 paragraphs 9.8 to 9.9B deal with subsidiaries excluded from consolidation. Where subsidiaries are excluded from consolidation these should be disclosed together with the reason for exclusion. These financial statements do not deal with these circumstances.
9.19A, 9.31, 9.32	FRS 102 paragraph 9.19A deals with the disposal of subsidiaries where control is retained. This circumstance is not included in these illustrative financial statements. FRS 102 paragraphs 9.31 to 9.32 deal with the exchange of businesses or other non-monetary assets for an interest in a subsidiary, jointly controlled entity or associate. These financial statements do not deal with these types of transactions.
	e. Foreign currency
	i. Functional and presentation currency
3.23(d)	The group financial statements are presented in pound sterling and rounded to thousands.
30.2, 30.26	The company's functional and presentation currency is the pound sterling.
	Commentary
30.3, 30.26	The functional currency is the currency of the primary economic environment in which the entity operates. When the presentation currency is different from the functional currency, an entity shall state that fact and disclose the functional currency and the reason for using a different presentation currency.
	ii. Transactions and balances
30.7, 30.8	Foreign currency transactions are translated into the functional currency using the spot exchange rates at the dates of the transactions.
30.9	At each period end foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined.
30.10, 30.11, 12.23	Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss account.
	Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the profit and loss account within 'finance (expense)/income'. All other foreign exchange gains and losses are presented in the profit and loss account within 'other operating (losses)/gains'.

30.18–30.20	iii. Translation
	The trading results of group undertakings are translated into sterling at the average exchange rates for the year. The assets and liabilities of overseas undertakings, including goodwill and fair value adjustments arising on acquisition, are translated at the exchange rates ruling at the year-end. Exchange adjustments arising from the retranslation of opening net investments and from the translation of the profits or losses at average rates are recognised in 'Other comprehensive income' and allocated to non-controlling interest as appropriate.
	Commentary
	Paragraph 30.18(b) of FRS 102 requires income and expenses to be translated at the dates of the transactions. Paragraph 30.19 states 'For practical reasons an entity may use a rate that approximates the exchange rates at the dates of transactions, for example an average rate for the period to translate income and expense items. However if exchange rates fluctuate significantly, the use of the average rate for the period may not be appropriate'.
	Paragraph 30.25 of FRS 102 requires disclosure of the amount of exchange differences recognised in profit or loss and those classified in equity arising in the period. It does not require the separate disclosure of cumulative amounts arising on translation and, when a foreign subsidiary is disposed of, paragraph 9.18B does not require the cumulative exchange differences to be included in the calculation of gain or loss on disposal but they are transferred to retained earnings.
	f. Revenue recognition
23.3, 23.4, 29.20, 23.30(a)	Revenue is measured at the fair value of the consideration received or receivable and represents the amount receivable for goods supplied or services rendered, net of returns, discounts and rebates allowed by the group and value added taxes.
	The group bases its estimate of returns on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.
23.5	Where the consideration receivable in cash or cash equivalents is deferred, and the arrangement constitutes a financing transaction, the fair value of the consideration is measured as the present value of all future receipts using the imputed rate of interest.
23.10	The group recognises revenue when (a) the significant risks and rewards of ownership have been transferred to the buyer; (b) the group retains no continuing involvement or control over the goods; (c) the amount of revenue can be measured
	reliably; (d) it is probable that future economic benefits will flow to the entity and (e) when the specific criteria relating to each of the group's sales channels have been met, as described below.
	i. Sale of goods – retail
23.11	The group operates retail shops for the sale of a range of branded and own branded products. Sales of goods are recognised on sale to the customer, which is considered the point of delivery. Retail sales are usually by cash, credit or payment card.
23.13, 23A.10	Sales are made to retail customers with a right to return within 28 days, subject to certain conditions regarding the usage. Accumulated experience is used to estimate and provide for such returns at the time of sale.
23.9, 23A.16, 23A.17	The group operates a number of country-based loyalty programmes based on an award of points at the time of individual transactions. On initial recognition the group treats this as two transactions and allocates the consideration received between the award and the other sale components.
	ii. Sale of goods – internet based transactions

23.10	The group sells goods via its websites for delivery to the customer or 'click and collect' at its retail shops. Revenue is recognised when the risks and rewards of the inventory are passed to the customer. For deliveries to the customer this is the point of acceptance of the goods by the customer and for 'click and collect' this is the time of collection. Transactions are settled by credit or payment card.
23.13	Provision is made for credit notes based on the expected level of returns which is based on the historical experience of returns.
	iii. Income from 'concession arrangements'
23.14–23.16, 23.30(a)	Certain brands have 'concession arrangements' in the group's stores whereby the group receives a fixed percentage payment based on the concessionaires' revenue. This revenue is recognised on an accruals basis.
	iv. Income from franchise fees
23.30(a)	In certain locations the group has franchised its brand to third parties. Fees charged for the use of the rights granted by the agreement and related services are recognised as revenue as the rights are used and the services are provided.
	v. Interest income
23.28, 23.29(a)	Interest income is recognised using the effective interest rate method.
	vi. Dividend income
23.28, 23.29(c)	Dividend income is recognised when the right to receive payment is established.
	Commentary
23.1–23.2A	Section 23 of FRS 102 provides guidance on accounting for revenue for (a) the sale of goods; (b) the rendering of services; (c) construction contracts and (d) the use by others of assets of the entity yielding interest, royalties or dividends. Revenue or other income arising from some transactions is dealt with in other sections. Section 23 excludes revenue or other income under insurance contracts which are dealt with in FRS 103.
	The appendix to Section 23 provides examples of revenue recognition under the principles in Section 23.
23.17–23.37	These illustrative financial statements do not include revenue under construction contracts. Guidance on such contracts is given in paragraphs 23.17 to 23.27 of FRS 102.
	g. Exceptional items
5.9, 5.9A	The group classifies certain one-off charges or credits that have a material impact on the group's financial results as 'exceptional items'. These are disclosed separately to provide further understanding of the financial performance of the group. [Disclosure should be expanded and tailored to describe exceptional items that have been separately identified by the group.]
	Commentary
5.9-5–10A	FRS 102 does not specifically define exceptional items, although extraordinary items are defined in paragraph 5.10A. Paragraph 5.9 of FRS 102 requires an entity to present additional line items, headings and subtotals when such a presentation is relevant to an understanding of the entity's financial performance. Paragraph 5.9A requires an entity to disclose items that are material. Paragraph 5.10A notes that the additional disclosures under paragraphs 5.9 and 5.9A are not extraordinary if they arise from the ordinary activities of the company.
	No exceptional items are disclosed in these illustrative financial statements. The above policy is included for illustration purposes only.
	Guidance on presentation of alternative performance measures, including items described as 'non-recurring', is given in the FRC's Corporate Reporting Thematic Review on Alternative Performance Measures.
	h. Employee benefits

28.1	The group provides a range of benefits to employees, including annual bonus arrangements, paid holiday arrangements and defined benefit and defined contribution pension plans.
	i. Short term benefits
28.4, 28.39	Short term benefits, including holiday pay and other similar non-monetary benefits, are recognised as an expense in the period in which the service is received.
	ii. Defined contribution pension plans
28.10(a), 28.13	The group operates a number of country-specific defined contribution plans for its employees. A defined contribution plan is a pension plan under which the group pays fixed contributions into a separate entity. Once the contributions have been paid the group has no further payment obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet. The assets of the plan are held separately from the group in independently administered funds.
	iii. Defined benefit pension plan
28.10(b)	The group operates a defined benefit plan for certain employees. A defined benefit plan defines the pension benefit that the employee will receive on retirement, usually dependent upon several factors including age, length of service and remuneration. A defined benefit plan is a pension plan that is not a defined contribution plan.
28.14, 28.15	The liability recognised in the balance sheet in respect of the defined benefit plan is the present value of the defined benefit obligation at the reporting date less the fair value of the plan assets at the reporting date.
28.17, 28.18	The defined benefit obligation is calculated using the projected unit credit method. Annually the group engages independent actuaries to calculate the obligation. The present value is determined by discounting the estimated future payments using market yields on high quality corporate bonds that are denominated in sterling and that have terms approximating the estimated period of the future payments ('discount rate').
28.15(b), 11.27–11.32	The fair value of plan assets is measured in accordance with the FRS 102 fair value hierarchy and in accordance with the group's policy for similarly held assets. This includes the use of appropriate valuation techniques.
28.23(d)	Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income. These amounts together with the return on plan assets, less amounts included in net interest, are disclosed as 'remeasurement of net defined benefit liability'.
28.23(a), (c)	The cost of the defined benefit plan, recognised in profit or loss as employee costs, except where included in the cost of an asset, comprises:
	the increase in pension benefit liability arising from employee service during the period; and the cost of plan introductions, benefit changes, curtailments and settlements.
28.23(b), 28.24– 28.24B	The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is recognised in profit or loss as 'finance expense'.
	Commentary
28.20	FRS 102 does not require the entity to engage an independent actuary to calculate its defined benefit obligation. Nor does the standard require the valuation to be performed annually. Paragraph 28.20 of FRS 102 gives guidance where actuaries are not engaged annually. If this option is taken then we would expect appropriate disclosure in note 4 'critical accounting judgements and estimation uncertainty'. In addition, if the plan is material the assumptions used and judgements made may also require disclosure in the critical accounting judgements and estimation uncertainty note.
28.15(b)	If the pension plan asset is an insurance policy that exactly matches the amount and timing of some or all of the benefits payable under the plan, the fair value of the asset is deemed to be the present value of the related obligation.

28.22	Where, at the reporting date, the present value of defined benefit obligation is less than the fair value of the plan assets, the plan has a surplus. An entity shall recognise a surplus only to the extent that it is able to recover the surplus either through reduced contributions in the future or through refunds from the plan. Where a surplus is restricted no additional liabilities shall be recognised in respect of an agreement with the defined benefit plan to fund a deficit (such as a schedule of
	contributions).
	iv. Annual bonus plan
28.8	The group operates a number of annual bonus plans for employees. An expense is recognised in the profit and loss account when the group has a legal or constructive obligation to make payments under the plans as a result of past events and a reliable estimate of the obligation can be made.
	Commentary
28.39	FRS 102 does not require disclosure about short term employee benefits. These illustrative financial statements voluntarily disclose this information.
	Other employee benefits are considered in Section 28 of FRS 102 including insured benefits (paragraph 28.12), termination benefits (paragraph 28.31) and other long term benefits, including long-term paid absence, sabbatical leave, long-service benefits, long-term disability and deferred remuneration (paragraph 28.29). These are not included in these illustrative financial statements.
	v. Share-based payments
	Group
	The group provides share-based payment arrangements to certain employees.
26.7–26.11	Equity-settled arrangements are measured at fair value (excluding the effect of non– market based vesting conditions) at the date of the grant. The fair value is expensed on a straight- line basis over the vesting period. The amount recognised as an expense is adjusted to reflect the actual number of shares or options that will vest.
26.12, 26.13	Where equity-settled arrangements are modified, and are of benefit to the employee, the incremental fair value is recognised over the period from the date of modification to date of vesting. Where a modification is not beneficial to the employee there is no change to the charge for share-based payment. Settlements and cancellations are treated as an acceleration of vesting and the unvested amount is recognised immediately in the income statement.
DV	The group has no cash-settled arrangements.
	Company
26.16	The company has no employees and thus there is no charge in the income statement for share-based payments. The charge for share-based payments has been recognised as an increase in cost of investment in subsidiaries.
	Commentary
26.14	These illustrative financial statements have not illustrated cash-settled share based payment arrangements. If the group had such arrangements the accounting policy would include the following wording: 'Cash-settled share options are measured at fair value at the balance sheet date. The group recognises a liability at the balance sheet date based on the fair value, taking into account the estimated number of options that will actually vest and the current proportion of the vesting period that has lapsed.
	Changes in the value of this liability are recognised in the income statement.'.
26.16	Where share-based payment awards have been granted by an entity to employees of one or more members in the group, a member may recognise and measure its share-based payment expense based on a reasonable allocation of the expense of the group.

	vi. Long term incentive plans
28.42	The group operates cash-settled long term incentive plans at an operating business level for certain members of management. The plans are based on the business's performance over a three-year period against budget on a variety of measures, including revenue growth, an adjusted operating profit measure, cash targets and an individual's personal targets in developing the business. A liability for the plan is raised on the estimated amount payable in terms of the incentive scheme plans.
	i. Taxation
29.2, 29.22	Taxation expense for the period comprises current and deferred tax recognised in the reporting period. Tax is recognised in the profit and loss account, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case tax is also recognised in other comprehensive income or directly in equity respectively.
29.17	Current or deferred taxation assets and liabilities are not discounted.
	i. Current tax
29.3–29.5	Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years. Tax is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the period end.
	Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.
	ii. Deferred tax
29.6	Deferred tax arises from timing differences that are differences between taxable profits and total comprehensive income as stated in the financial statements. These timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements.
29.6–29.8	Deferred tax is recognised on all timing differences at the reporting date. Unrelieved tax losses and other deferred tax assets are only recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.
29.12–29.14	Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the period end and that are expected to apply to the reversal of the timing difference.
	Commentary
	These illustrative financial statements do not include investment properties. There are deferred taxation requirements for this type of assets which are considered in paragraph 29.16 of FRS 102.
	j. Business combinations and goodwill
19.6	Business combinations are accounted for by applying the purchase method.
19.11, 19.11A	The cost of a business combination is the fair value of the consideration given, liabilities incurred or assumed and of equity instruments issued plus the costs directly attributable to the business combination. Where control is achieved in stages the cost is the consideration at the date of each transaction.
19.12, 19.13	Contingent consideration is initially recognised at estimated amount where the consideration is probable and can be measured reliably. Where (i) the contingent consideration is not considered probable or cannot be reliably measured but subsequently becomes probable and measurable or (ii) contingent consideration previously measured is adjusted, the amounts are recognised as an adjustment to the cost of the business combination.

On acquisition of a business, fair values are attributed to the identifiable assets, liabilities and contingent liabilities unless the fair value cannot be measured reliably, in which case the value is incorporated in goodwill. Intangible assets are only recognised separately from goodwill where they are separable and arise from contractual or other legal rights. Where the fair value of contingent liabilities cannot be reliably measured they are disclosed on the same basis as other contingent liabilities.
Goodwill recognised represents the excess of the fair value and directly attributable costs of the purchase consideration over the fair values to the group's interest in the identifiable net assets, liabilities and contingent liabilities acquired.
On acquisition, goodwill is allocated to cash-generating units ('CGU's') that are expected to benefit from the combination.
Goodwill is amortised over its expected useful life which is estimated to be ten years. Goodwill is assessed for impairment when there are indicators of impairment and any impairment is charged to the income statement. No reversals of impairment are recognised.
Commentary
FRS 102 requires entities to include any costs directly attributable to the business combination in the cost of the business combination.
Where control is achieved following a series of transactions the cost of the business combination is the aggregate of the fair values of the assets given, liabilities assumed and equity instruments issued. When a controlling interest is increased, the subsidiary's identifiable assets and liabilities (including contingent liabilities) are not revalued to fair value, and no additional goodwill is recognised. Such transactions are accounted for as transactions between equity holders.
Goodwill is considered to have a finite useful life and should be amortised on a systematic basis over its life. If the useful life cannot be measured reliably the life shall not exceed ten years. Goodwill is tested for impairment in accordance with Section 27 of FRS 102.
FRS 102 requires negative goodwill to be recognised on the balance sheet. These illustrative financial statements do not include negative goodwill. If negative goodwill is recognised, the accounting policy disclosure included above would be: 'Where the cost of the business combination exceeds the fair value of the group's interest in the assets, liabilities and contingent liabilities acquired, negative goodwill arises. The group, after consideration of the assets, liabilities and contingent liabilities acquired and the cost of the combination, recognises negative goodwill on the balance sheet and releases this to profit and loss, up to the fair value of non-monetary assets acquired, over the periods in which the non-monetary assets are recovered and any excess over the fair value of non-monetary assets in the income statement over the period expected to benefit.'
Recognition of intangible assets separately from goodwill is only required where they meet the recognition criteria, are separable and arise from contractual or other legal rights. Entities may choose to separately recognise additional intangible assets on acquisition if they meet the recognition criteria, and are either separable or arise from contractual or other legal rights. This is an accounting policy choice which should be applied consistently to a class of intangible assets and to all business combinations.
k. Intangible assets
Intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated, using the straight-line method, to allocate the depreciable amount of the assets to their residual values over their estimated useful lives, as follows:
Software: 3–5 years
Acquired brands and trademarks: 5–10 years
Amortisation is included in 'administrative expenses' in the profit and loss account.
Where factors, such as technological advancement or changes in market price, indicate that residual value or useful life have changed, the residual value, useful life or amortisation rate are amended prospectively to reflect the new circumstances.

The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired. 18.8E, 18.8H Costs associated with maintaining computer software are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the group are recognised as intangible assets when the following criteria are met: it is technically feasible to complete the software so that it will be available for use; management intends to complete the software and use or sell it; there is an ability to use or sell the software; it can be demonstrated how the software will generate probable future economic benefits; adequate technical, financial and other resources to complete the development and to use or sell the software are available; and the expenditure attributable to the software during its development can be reliably measured. Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Commentary Section 18 of FRS 102 considers intangible assets other than goodwill and section 19 considers business combinations and goodwill. FRS 102 paragraph 18.23 requires an entity to assume a residual value of zero unless there is a commitment by a third party to purchase the asset or there is an active market for the asset and the residual value can be determined by reference to the market and the market will exist at the end of the asset's useful life. I. Tangible assets 17.15A, 17.10, Tangible assets are stated at cost (or deemed cost) less accumulated depreciation and 17.31(a) accumulated impairment losses. Cost includes the original purchase price, costs directly attributable to bringing the asset to its working condition for its intended use, dismantling and restoration costs. i. Land & buildings Land and buildings include freehold and leasehold retail outlets and offices. Land and 17.8, 17.9, 17.15A buildings are stated at cost (or deemed cost for land and buildings held at valuation at the date of transition to FRS 102) less accumulated depreciation and accumulated impairment losses. ii. Plant and machinery and fixtures, fittings, tools and equipment 17.15A Plant and machinery and fixtures, fittings, tools and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. iii. Depreciation and residual values 17.18-17.22, 17.31(b), Land is not depreciated. Depreciation on other assets is calculated, using the straight-line method, to allocate the depreciable amount to their residual values over their estimated (c) useful lives, as follows: Freehold buildings: over periods up to 50 years Long leasehold property: over the shorter of 50 years and the remaining lease period Short leasehold property: over the period of the lease Plant and machinery: 10-15 years Fixtures and fittings: 3-8 years 10.16, 17.19 The assets' residual values and useful lives are reviewed, and adjusted, if appropriate, at the end of each reporting period. The effect of any change is accounted for prospectively.

	iv. Subsequent additions and major components
17.4	Subsequent costs, including major inspections, are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that economic benefits associated with the item will flow to the group and the cost can be measured reliably.
17.6	The carrying amount of any replaced component is derecognised. Major components are treated as separate assets where they have significantly different patterns of consumption of economic benefits and are depreciated separately over their useful lives.
17.12	Repairs, maintenance and minor inspection costs are expensed as incurred.
	v. Assets in the course of construction
17.20	Assets in the course of construction are stated at cost. These assets are not depreciated until they are available for use and are reviewed for impairment at each reporting date.
	vi. Derecognition
17.28–17.30	Tangible assets are derecognised on disposal or when no future economic benefits are expected. On disposal, the difference between the net disposal proceeds and the carrying amount is recognised in profit or loss and included in 'Other operating (losses)/gains'.
	Commentary
17.15, 17.15B–17.15F	FRS 102 allows for the revaluation model to be applied to all items in a class of tangible assets whose fair value can be measured reliably. Revaluations should be made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value. This is not included in these illustrative financial statements.
	m. Borrowing costs
25.2	All borrowing costs are recognised in profit or loss in the period in which they are incurred.

Where the implicit rate cannot be determined, the group's incremental borrowing rate is used. Incremental direct costs, incurred in negotiating and arranging the lease, are included in the

	ii. Operating leased assets
20.4, 20.7, 20.15	Leases that do not transfer all the risks and rewards of ownership are classified as operating leases. Payments under operating leases are charged to the profit and loss account on a straight-line basis over the period of the lease.
	iii. Lease incentives
	Incentives received to enter into a finance lease reduce the fair value of the asset and are included in the calculation of present value of minimum lease payments.
20.15A	Incentives received to enter into an operating lease are credited to the profit and loss account, to reduce the lease expense, on a straight-line basis over the period of the lease.
	Commentary
20.1	Section 20 of FRS 102 does not address certain specific arrangements including mineral and similar arrangements, licencing agreements, investment property measurement, biological assets and leases resulting in a loss.
20.15, 20.15A	Operating leases should be expensed on a straight-line basis unless another systematic basis is representative of the time pattern of the user's benefit or the payments are structured to increase in line with expected inflation to compensate for the lessor's expected cost inflationary cost increases. This similarly applies to related lease incentives.
20.32–20.34	The group has no sale and leaseback transactions. These would be required to be considered under paragraphs 20.32 to 20.34 of FRS 102.
20.15B-D New requirement (where relevant)	Amendments have been made to Section 20 Leases, of FRS 102 which require entities to recognise changes in operating lease payments that arise from COVID-19-related rent concessions on a systematic basis over the periods that the change in lease payments is intended to compensate. The FRC considers that this would best reflect the economic substance of the benefit of these concessions and their temporary nature and improve the consistency of reporting for users of financial statements. The requirements only apply to temporary rent concessions occurring as a direct consequence of the COVID-19 pandemic, when any reduction in lease payments affects only payments originally due on or before 30 June 2022. The effective date for these amendments is accounting periods beginning on or after 1 January 2021, hence entities impacted by this are expected to update their accounting policies and reflect disclosures in the financial statements, accordingly.
	o. Impairment of non-financial assets
27.2–27.10, 17.24, 18.25	At each balance sheet date non-financial assets not carried at fair value are assessed to determine whether there is an indication that the asset (or asset's cash generating unit) may be impaired. If there is such an indication the recoverable amount of the asset (or asset's cash generating unit) is compared to the carrying amount of the asset (or asset's cash generating unit).
27.11–27.20A	The recoverable amount of the asset (or asset's cash generating unit) is the higher of the fair value less costs to sell and value in use. Value in use is defined as the present value of the future cash flows before interest and tax obtainable as a result of the asset's (or asset's cash generating unit's) continued use. These cash flows are discounted using a pre-tax discount rate that represents the current market risk– free rate and the risks inherent in the asset.
27.6, 27.21–27.23	If the recoverable amount of the asset (or asset's cash generating unit) is estimated to be lower than the carrying amount, the carrying amount is reduced to its recoverable amount. An impairment loss is recognised in the profit and loss account, unless the asset has been revalued when the amount is recognised in other comprehensive income to the extent of any previously recognised revaluation. Thereafter any excess is recognised in profit or loss.
27.29–27.31	If an impairment loss is subsequently reversed, the carrying amount of the asset (or asset's cash generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the revised carrying amount does not exceed the

	carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised in prior periods. A reversal of an impairment loss is recognised in the profit and loss account.
	Goodwill is allocated on acquisition to the cash generating unit expected to benefit from the synergies of the combination. Goodwill is included in the carrying value of cash generating units for impairment testing.
	Commentary
27.24–27.27	There are additional requirements for the impairment of goodwill. Additional requirements for the impairment of goodwill are addressed in paragraphs 27.24 to 27.27 of FRS 102, including where there are non-controlling interests and goodwill cannot be allocated to cash generating units.
	p. Investments – company
	i. Investment in subsidiary company
9.26	Investment in a subsidiary company is held at cost less accumulated impairment losses.
	ii. Investment in associate
14.4(a)	Investment in an associate is held at cost less accumulated impairment losses.
	Commentary
9.26	FRS 102 allows a parent company to select an accounting policy for accounting for its investments in subsidiaries, associates and jointly controlled entities. It may measure the investment:
	at cost less impairment;
	at fair value with changes recognised in other comprehensive income; or
	at fair value with changes recognised in profit or loss.
	The same accounting policy should be applied for all investments in a single class (subsidiaries, associates or jointly controlled entities), but different policies can be used for different classes.
SI 2008/410 1 Sch 36	The Companies Act 2006 does not permit investments in subsidiaries to be carried at fair value through profit or loss.
	q. Inventories
13.4, 13.20	Inventories are stated at the lower of cost and estimated selling price less costs to sell. Inventories are recognised as an expense in the period in which the related revenue is recognised.
13.6–13.9, 13.11, 13.18, 13.22(a)	Cost is determined on the first-in, first-out (FIFO) method. Cost includes the purchase price, including taxes and duties and transport and handling directly attributable to bringing the inventory to its present location and condition.
13.19, 27.2–27.4	At the end of each reporting period inventories are assessed for impairment. If an item of inventory is impaired, the identified inventory is reduced to its selling price less costs to complete and sell and an impairment charge is recognised in the profit and loss account. Where a reversal of the impairment is required the impairment charge is reversed, up to the original impairment loss, and is recognised as a credit in the profit and loss account.
	Commentary
13.16	An entity may use techniques such as the standard cost method, the retail method or most recent purchase price if the result approximates cost.
	The group dealt with in these illustrative financial statements has no own– manufactured inventory. Disclosure of an illustrative accounting policy for such items is included in the UK GAAP Limited illustrative entity financial statements. These illustrative financial statements do not include construction contract activities.

	r. Cash and cash equivalents
7.2	Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. Bank overdrafts, when applicable, are shown within borrowings in current liabilities.
	Commentary
7.2	Bank overdrafts are normally considered financing activities similar to borrowings. However if they are repayable on demand and form an integral part of an entity's cash management, bank overdrafts are a component of cash and cash equivalents.
	s. Provisions and contingencies
	i. Provisions
21.4	Provisions are recognised when the group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount of the obligation can be estimated reliably.
21.7(a)	Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations might be small.
21.11B-21.11D	In particular:
	<ul> <li>restructuring provisions are recognised when the group has a detailed, formal plan for the restructuring and has raised a valid expectation in those affected by either starting to implement the plan or announcing its main features to those affected and therefore has a legal or constructive obligation to carry out the restructuring; and</li> <li>provision is not made for future operating losses.</li> </ul>
21.7, 21.11	Provisions are measured at the present value of the expenditures expected to be required
21.7, 21.11	to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as a finance cost.
	ii. Contingencies
21.12	Contingent liabilities are not recognised, except those acquired in a business combination. Contingent liabilities arise as a result of past events when (i) it is not probable that there will be an outflow of resources or that the amount cannot be reliably measured at the reporting date or (ii) when the existence will be confirmed by the occurrence or non-occurrence of uncertain future events not wholly within the group's control. Contingent liabilities are disclosed in the financial statements unless the probability of an outflow of resources is remote.
21.13, 21.16	Contingent assets are not recognised. Contingent assets are disclosed in the financial statements when an inflow of economic benefits is probable.
	Commentary
29.23	Provisions include deferred tax liabilities. The accounting policy for deferred taxation is included in the taxation accounting policy note.
	t. Financial instruments
11.2, 12.2(a)	The group has chosen to adopt Sections 11 and 12 of FRS 102 in respect of financial instruments.
11.13, 11.40	Basic financial assets, including trade and other receivables, cash and bank balances and investments in commercial paper, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest.

11.14(a),11.15–11.20	Such assets are subsequently carried at amortised cost using the effective interest method.
11.14, 11.21, 11.25	At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.
11.26	If there is a decrease in the impairment loss arising from an event occurring after the impairment was recognised, the impairment is reversed. The reversal is such that the current carrying amount does not exceed what the carrying amount would have been had the impairment not previously been recognised. The impairment reversal is recognised in profit or loss.
11.11, 11.40, 12.7	Other financial assets, including investments in equity instruments which are not subsidiaries, associates or joint ventures, are initially measured at fair value, which is normally the transaction price.
12.8	Such assets are subsequently carried at fair value and the changes in fair value are recognised in profit or loss, except that investments in equity instruments that are not publicly traded and whose fair values cannot be measured reliably are measured at cost less impairment.
11.33	Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled; or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party; or (c) despite having retained some significant risks and rewards of ownership, control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.
	ii. Financial liabilities
11.9, 11.10, 11.13, 11.40	Basic financial liabilities, including trade and other payables, bank loans, loans from fellow group companies and preference shares that are classified as debt, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest.
11.13–11.20	Debt instruments are subsequently carried at amortised cost, using the effective interest rate method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.
4.7, 11.10, 11.13	Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.
11.11	Derivatives, including interest rate swaps and forward foreign exchange contracts, are not basic financial instruments.
12.7, 12.8	Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. Changes in the fair value of derivatives are recognised in profit or loss in finance costs or finance income as appropriate, unless they are included in a hedging arrangement.
11.36	Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires.

	iii. Compound financial instruments
22.13–22.15	Compound financial instruments issued by the group comprise convertible loan notes that can be converted to share capital at the option of the holder, and the number of shares to be issued does not vary with changes in their fair value.
	The liability component of a compound financial instruments is initially recognised at the fair value of a similar liability that does not have an equity conversion option.
	The equity component is initially recognised at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.
	Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortised cost using the effective interest method. The equity component of a compound financial instrument is not re-measured subsequent to initial recognition except on conversion or expiry.
	iv. Offsetting
11.38A	Financial assets and liabilities are offset and the net amounts presented in the financial statements when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.
	v. Hedging arrangements
	The group does not generally apply hedge accounting in respect of forward foreign exchange contracts held to manage the cash flow exposures of forecast transactions denominated in foreign currencies.
12.23	The group applies hedge accounting for transactions entered into to manage the cash flow exposures of borrowings. Interest rate swaps are held to manage the interest rate exposures and are designated as cash flow hedges of floating rate borrowings.
	Changes in the fair values of derivatives designated as cash flow hedges, and which are effective, are recognised directly in equity. Any ineffectiveness in the hedging relationship (being the excess of the cumulative change in fair value of the hedging instrument since inception of the hedge over the cumulative change in the fair value of the hedged item since inception of the hedge) is recognised in the income statement.
12.23, 12.25	The gain or loss recognised in other comprehensive income is reclassified to the income statement when the hedge relationship ends. Hedge accounting is discontinued when the hedging instrument expires, no longer meets the hedging criteria, the forecast transaction is no longer highly probable, the hedged debt instrument is derecognised or the hedging instrument is terminated.
	Commentary
	These illustrative financial statements present examples of basic financial instruments under Section 11 of FRS 102 and examples of other financial instruments under Section 12.
	Entities should evaluate the contractual terms and conditions of financial instruments and consider the scope requirements of Sections 11 and 12 when evaluating such instruments.
	FRS 102 paragraphs 11.2 and 12.2 give an accounting policy choice for financial instruments, namely:
	a apply the provisions of FRS 102 in full; or
	<ul> <li>apply the recognition and measurement provisions of IAS 39 (as adopted for use in the UK) and the disclosure requirements of FRS 102; or</li> </ul>
	c apply the recognition and measurement provisions of IFRS 9 and/or IAS 39 (as amended following the publication of IFRS 9) and the disclosure requirements of FRS 102.
	FRS 102 paragraphs 12.15 to 12.25A contain the detailed requirements for hedge accounting.

	u. Share capital
22.3, 22.7–22.10	Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from the proceeds.
	v. Distributions to equity holders
6.3(c)(iii), 32.8	Dividends and other distributions to the group's shareholders are recognised as a liability in the financial statements in the period in which the dividends and other distributions are approved by the shareholders. These amounts are recognised in the statement of changes in equity.
	Commentary
	Directors can propose final dividends to be approved by members. Dividends become a legally binding liability when a private company's members' written resolution is passed, regardless of the date on which it is to be paid. A proposed unapproved final dividend is not a legal obligation to shareholders and is not recognised as a liability at the balance sheet date.
	w. Related party transactions
33.1A, 33.14	The group discloses transactions with related parties which are not wholly owned within the same group. Where appropriate, transactions of a similar nature are aggregated unless, in the opinion of the directors, separate disclosure is necessary to understand the effect of the transactions on the group financial statements.

	4. Critical accounting judgements and estimation uncertainty
8.6, 8.7	Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.
	a. Critical judgements in applying the group's accounting policies
	i. Control of Scottish Department Stores Limited ('SDS')
9.5(b)	Assessing whether the group controls SDS requires judgement. The group holds less than 50% of the voting rights but through a shareholder's agreement the group
	controls the operating and financial policies of SDS. This agreement includes the power to set the annual budget and financial plan, appoint and remove senior executives and set their remuneration, and set operating procedures and responsibilities. The group considers that these powers demonstrate that the group controls SDS.
	b. Key accounting estimates and assumptions
8.7	The group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.
	i. Recoverable amount of U&U cash-generating unit (note 13a)
	Annually, the group considers whether intangible assets and/or goodwill are impaired. Where an indication of impairment is identified the estimation of recoverable value requires estimation of the recoverable value of the cash– generating units (CGUs). This requires estimation of the future cash flows from the CGUs and also selection of appropriate discount rates in order to calculate the net present value of those cash flows. The recoverable amount of the U&U CGU is a source of significant estimation uncertainty and determining this involved the use of significant assumptions. See note 13a for details of the key assumption and sensitivity analysis.
	ii. Defined benefit pension scheme (note 22)
	The group has obligations to pay pension benefits to certain employees. The cost of these benefits and the present value of the obligation depend on a number of factors, including; life expectancy, salary increases, asset valuations and the discount rate on corporate bonds. Management estimates these factors in determining the net pension obligation in the balance sheet. The assumptions reflect historical experience and current trends. For details of assumptions adopted, see note 22.
	iii. Dilapidations provision (note 23)
	Provision is made for dilapidations. This requires management's best estimate of the expenditure that will be incurred based on contractual requirements. In addition, the timing of the cash flows and the discount rates used to establish net present value of the obligations require management's judgement. For further details and range of potential provision values, see note 23.
	Commentary
	Paragraphs 8.6 and 8.7 of FRS 102 require disclosure of the significant accounting policies and judgements and key sources of estimation uncertainty used in preparing the amounts recognised in the financial statements.
	In relation to estimation uncertainty, we have illustrated the uncertainty for the recoverability of a CGU and dilapidations provision using sensitivities and ranges of potential outcomes as we consider this is information that would help users of the financial statements understand the judgements made by management. However, we note that these sensitivity disclosures are not explicitly required by paragraph
	8.7 of FRS 102.

#### Commentary – Impact of COVID-19

Due to the pervasive impact of COVID-19 on some entities there might be critical judgements made in determining that the entity is a going concern. In such cases disclosures are expected to the extent that there is more judgment around the use of the going concern assumption and consideration of whether there is a material uncertainty to the disclosure.

The impact of COVID-19 might also result in critical estimates being made in the calculation of impairment of financial assets and non-financial assets like property, plant and equipment, goodwill, other intangible assets and inventories; recoverability of deferred tax assets; and fair valuation of investment properties (where entities have investment properties carried at fair value). Disclosure of assumptions made for such estimates would be required in the financial statements. Readers can refer to our dedicated web site which provides many useful resources and is constantly updated to reflect latest COVID-19 accounting developments.

## **Commentary – impact of Brexit**

The UK left the European Union ('EU') on 31 January 2020, with a transition period which ran until 31 December 2020. For some entities, the implementation period (IP) completion date on 31 December 2020 may have introduced additional risks that should be factored into reporting. For some businesses, these impacts could be significant, especially when considered alongside the impact of COVID-19. The consequential accounting and reporting implications include:

- Disclosures Detailed and entity-specific disclosure of Brexit-related risks should be made to explain the judgements taken, assumptions made and the impact on the entity's operations. The FRC and other regulators have made it clear that they expect entities to disclose information about the specific and direct challenges to their business model and operations, as distinct from information about broader economic uncertainties. Where there are particular threats, for example the possible effect of changes in import/export taxes or delays to their supply chain, the regulators expect entities to identify these clearly and for management to describe any actions they are taking, or have taken, to manage the potential impact. The broad uncertainties that may still attach to Brexit when companies report will require disclosure of sufficient information to help users understand the degree of sensitivity of assets and liabilities to changes in management's assumptions.
- Impairments and valuations Valuations, measurements and recoverable amount calculations that use market inputs should reflect market data at the balance sheet date. If valuation techniques and estimates are applied, cash flow models for impairment testing will likely require a wider range of outcomes than usual to reflect a broad spectrum of possible post Brexit scenarios. Restructuring – Some entities have already or are considering reorganising their business. It is unlikely that contemplated restructuring will have an immediate impact on the financial statements. However, plans over time could result in impairments/disposals of assets, recognition of provisions or changes to segments and disclosure.
- Directors duties and dividends Directors need to consider, apart from statutory duties, their fiduciary duties to safeguard the company's assets and ensure that the company is able to pay its debts as they fall due. This would be relevant when deciding on dividend payments as Brexit might affect the company's financial position.
- Tax The new limited trade agreement and future trade arrangements, could result in significant changes to the tax law that applies to UK and EU companies. Some of the main areas that might be impacted include: tax on rolled-over gains from previous reorganisations; withholding taxes on dividends; and deferred tax assets recognition if taxable profits increase/decrease as various tax reliefs are withdrawn. For further guidance refer to our In depth publication Accounting and reporting implications of Brexit.

### 9. Share-based payments

26.18(a)

The group operates two share-based payment schemes for its employees.

## A) All-employee share option scheme

All employees are granted share options in the company as part of the All-employee share scheme. The options are granted with a fixed exercise price, are exercisable three years after the date of grant and expire four years after the date of grant.

Employees are not entitled to dividends until the shares are exercised. Employees are required to remain in employment with the group until exercise, otherwise the awards lapse. The group makes annual grants on 30 September each year. On exercise of the options by the employees, the company issues new shares.

### B) Key-employee share option scheme

In addition to the All-employee share option scheme, certain employees participate in the Keyemployee share option scheme which provides additional remuneration for those employees who are key to the operations of the group. The options are granted with an exercise price equaling the nominal value of the shares, are exercisable three years after the date of grant and expire ten years after the date of grant. Employees are not entitled to dividends until the shares are exercised.

Vesting of the options is subject to continued employment within the group and meeting agreed revenue targets (non-market performance conditions). The group makes annual grants on 31 March each year.

On exercise of the options by the employees, the group issues shares previously held as treasury shares by the Employee Benefit Trust.

#### All schemes

A reconciliation of share option movements over the year to 31 December 2021 is shown below:

	2021		2	2020		
	No. Weighted average exercise price		No.		average exercise	
	000	£	000	£		
Outstanding at 1 January	64	£1.60	60	£1.43		
Granted	36	£1.80	47	£1.52		
Forfeited	(6)	£1.42	(6)	£1.24		
Exercised	(40)	£1.54	(35)	£1.27		
Expired	(2)	£1.70	(2)	£1.57		
Outstanding at 31 December	52	£1.80	64	£1.60		
Exercisable at 31 December	22	£1.45	30	£1.51		

26.19

The group is unable to directly measure the fair value of employee services received. Instead the fair value of the share options granted during the year is determined using the Black-Scholes model. The model is internationally recognised as being appropriate to value employee share schemes similar to the All-employee and Key-employee schemes.

26.12(b), 26.21	During the year, the group modified the 2019 Key-employee share scheme as the revenue targets set at the date of grant were not sufficiently challenging and the award was not operating as intended. The modified awards had amended revenue targets and the vesting period was extended to three years from the date of modification. Due to the amended targets, the award was not beneficial to the employees at the date of modification, so no additional charge is recognised for the modification.				
26.23(a)	The total charge for the year was £263,000 (2020: £360,000).				
	Commentary				
26.20, 26.23(b)	If the group operates cash-settled share-based payments it should disclose how the liability is measured and the carrying amount of the liability at the end of the period.

In the Spring Budget 2021, the UK Government announced that from 1 April 2023 the corporation tax rate would increase to 25% (rather than remaining at 19%, as previously enacted). This new law was substantively enacted on 24 May 2021. Deferred taxes at the balance sheet date have been measured using these enacted tax rates and reflected in these financial statements.

### Commentary

32.11(h)

29.27(d)

Sommentary

(h) The effects of a change in tax rate that is substantively enacted after the balance sheet date but before the accounts are signed must be disclosed as a non-adjusting post balance sheet event if the effects of the change are significant.

### 23. Provision for other liabilities

### Group

### The group had the following provisions during the year:

SI 2008/410 1 Sch 59, 60		Asset retirement obligations	Dilapidations provisions	Onerous lease provisions	Re– organisation provision	Long term employee benefits	Acquired contingent liabilities	Deferred tax provision	Total
21.14(a)(i)	At 1 January 2021	1,046	3,769	2,837	-	984	-	72	8,708
21.14(a)(ii)	Capitalised in cost of assets	485	_	_	_	_	_	_	485
21.14(a)(ii)	Additions dealt with in profit or loss	_	741	_	2,007	453	_	(1,900)	1,301
21.14(a)(ii)	Additions dealt with in other comprehensive income	_	_	_	_	_	_	(104)	(104)
21.14(a)(ii)	Business combinations	_	657	-	-	_	362	1,901	2,920
21.14(a)(ii)	Unwind of discount	78	223	184	_	_	-	_	485
21.14(a)(iii)	Amounts utilised	_	(366)	(547)	(756)	(823)	(123)	_	(2,615)
	Foreign exchange translation adjustment	45	55	_	109	76	-	272	557
21.14(a)(iv)	Unused amounts reversed to the profit and loss account	-	(333)	_	-	-	_	_	(333)
21.14(a)(i)	At 31 December 2021	1,654	4,746	2,474	1,360	690	239	241	11,404
	Asset retire	ment obliga	ations						
21.14(b),(c)	As part of its property leasing arrangements, the group has an obligation to return some proper to their original conditions. Where the group has conducted significant leasehold improvements such as installing mezzanine floors or partition walls, it has an obligation to remove these improvements. The present value of the expected cost is capitalised as a part of the leasehold improvement asset. The provision is expected to be utilised at the end of the respective leases between 2022 and 2033.							nts, d	
	Dilapidation	s provisior	۱						

As part of the group's property leasing arrangements there is an obligation to repair damages 21.14(b),(c), 8.7

which incur during the life of the lease, such as wear and tear. The cost is charged to profit and loss as the obligation arises. The provision is expected to be utilised between 2022 and 2033 as the leases terminate.

Due to the significant number of leased properties in the group and the difficulties in predicting expenditure that will be required on return of a property to the landlord many years into the future, the dilapidations provision is considered a source of significant estimation uncertainty. The provision has been calculated using historical experience of actual expenditure incurred on dilapidations and estimated lease termination dates. The directors consider the possible range of dilapidations provision at 31 December 2021 to between £3,886,000 and £4,975,000. The most likely amount within this range, £4,746,000, has been recognised in the balance sheet.

	Onerous lease provisions				
21.14(b),(c)	Where leasehold properties become vacant, the group pro income, to the end of the lease or the anticipated date of t relates to warehouse properties in Oxford and Cambridge surplus to the group's requirements. The provision is exper related leases to 2023 and 2025 respectively.	the disposal or subleas which were vacated ir	e. This provision 2018 and are		
	Reorganisation provision				
21.14(b),(c)	On 22 October 2021, the group announced its intention to the UK and Germany. Whilst all sites remain operational, make 125 employees redundant, as they were no longer i employees were made redundant, utilising part of the prov paid in 2022 as their employment is terminated.	the group announced i required by the group.	ts intention to During the year, 30		
	Long term employee benefits				
21.14(b),(c), 28.42	The group provides certain employees with a cash-settled long-term incentive plan. Amounts payable under the plan are dependent on the business performance over a three year period and individual's personal targets. Employees are required to remain in employment with the group to receive the cash payment. The group does not set aside assets to fund the payments and pays the benefits out of cash resources. The amount provided is expected to be paid between 2022 and 2024.				
	Acquired contingent liabilities				
19.15(c), 21.14(b),(c)	As part of the acquisition of Chain Stores Limited the group has recognised the contingent liabilities of the acquired business where they can be measured reliably. The amounts relate to certain employee claims for holiday pay and equal wages, some of which the group settled following acquisition. The group will defend the remaining claims. Any settlement of the provisions will be paid in 2022, dependent upon the outcome of any arbitration, mediation or legal proceedings.				
	Commentary				
21.14	Comparative information is not required.				
	Deferred tax				
29.27(e)	The provision for deferred tax consists of the following def	ferred tax liabilities/(as	sets):		
		2021	2020		
	Acquired intangible assets	2,154	962		
	Acquired tangible assets	943	956		
	Post-employment benefits	(1,927)	(1,829)		
	Derivative financial liabilities	(423)	(432)		
	Share based payments	(203)	(276)		
	Provisions	(2,095)	(1,530)		
	Capital allowances	1,202	1,768		
	Other timing differences	590	453		
	Total provision	241	72		
29.27(e),(f)	There are no unused tax losses or unused tax credits.				
29.27(c)	The net deferred tax liability expected to reverse in 2022 i reversal of timing differences on acquired intangible and t through depreciation and amortisation, offset by expected to utilise provisions.	angible assets and cap	oital allowances		
	Company				
	The company had no deferred tax provision at 31 Deceml	ber 2021 (2020: £nil).			

	24. Financial instruments					
	Group					
	The group has the following financial instrume	ents:				
		Note	2021	2020

DV	<ul> <li>Contingent consideration</li> </ul>	30	(3,430)	_		
			(3,430)	_		

	Commentary				
19.13	Contingent consideration is measured at fair value based on the expected amounts payable, discounted at an appropriate market rate. Changes in the fair value are added to the cost of the business combination.				
1.12(c)	Qualifying entities are exempt from disclosing the requirements of FRS 102 paragraphs 11.42, 11.44, 11.45, 11.47, 11.48(a)(iii), 11.48(a)(iv), 11.48(b), 11.48(c),				
	12.26, 12.27, 12.29(a), 12.29(b) and 12.29A providing the equivalent disclosures are included in the consolidated financial statements of the group in which the entity is consolidated.				

11.48B	Financial institutions, as defined by the standard, should provide additional disclosures for financial instruments as specified in paragraphs 34.17–34.33 of FRS 102.					
11.7(a)	Investments in subsidiaries, associates and joint ventures are excluded from the scope of section 11 and so are not included in the table above.					
	Derivative financial instruments – Forward contracts					
11.42	The group enters into forward foreign currency contracts to mitigate the exchange rate r certain foreign currency payables. At 31 December 2021, the outstanding contracts all n within 6 months (2020: 9 months) of the year end. The group is committed to buy US\$50 €450,000 and pay a fixed sterling amount (2020: US\$1,000,000 and €800,000).					
11.43, SI 2008/410 1 Sch 55	The forward currency contracts are measured at fair value, which is determined using valuation techniques that utilise observable inputs. The key inputs used in valuing the derivatives are the forward exchange rates for GBP:USD and GBP:EUR. The fair value of the forward-foreign currency contracts is £81,000 (2020: £156,000).					
	Derivative financial instruments – Inter	rest rate swaps				
11.42	The group has entered into an interest rate swap to receive interest at LIBOR and pay interest at a fixed 2.5%. The swap is based on a principal amount of					
	£50,000,000, the principal amount of the group's sterling Senior loan facilities, and matures in 2023 on the same date as the Senior loans.					
12.27	The instrument is used to hedge the group's exposure to interest rate movements on the Senior loan facility. The hedging arrangement fixes the total interest payable on the sterling Senior loan to 7.5%. The fair value of the interest rate swap is £1,922,000 (2020: £1,877,000).					
12.28	Cash flows on both the loan and the interest rate swaps are paid quarterly until 2023. During 2021, a hedging loss of £335,000 (2020: £294,000 gain) was recognised in other comprehensive income for changes in the fair value of the interest rate swap and £304,000 (2020: £513,000) was reclassified from the hedge reserve to profit and loss.					
	Commentary					
	Paragraph 11.41 of FRS 102 requires disclosure of the fair value of financial assets and financial liabilities measured at fair value through profit or loss and paragraph 12.27(b) requires disclosure of the fair value of hedging instruments. In addition SI 2008/410 1 Sch 55 requires that the fair value of each category of financial instruments is disclosed and accordingly the fair value of forward currency contracts is also disclosed.

Non-cash movements represent effective interest rate adjustments which include debt issue costs.

#### Commentary

7.22

Comparative information is not required.

### 27. Contingent liabilities

### Group

21.17A, SI 2008/410 1 Sch 63 The group has given a guarantee in respect of the bank borrowings of Click & Deliver Limited, the group's associate. At 31 December 2021, the group guaranteed £8,700,000 (2020: £8,500,000) being its share of the associate's debt to Localbank Ltd. The guarantee is secured by a charge on the group's trading subsidiaries.

### Group and company

21.15, SI 2008/410 1 Sch 63 A claim has been made against the group for inappropriate use of personal data by a group of customers. The group believes it has acted properly and has a robust defence and accordingly no provision has been made. The matter could end up in legal proceedings and it has been estimated that should the claim be successful the liability would be between £200,000 and £300,000.

### Commentary

Where a subsidiary is exempt from preparing individual financial statements under Companies Act 2006 section 394A or exempt from audit under section 479A, the parent company is required to disclose, in the notes to the consolidated financial statements, that the subsidiary company is so exempt. One of the conditions of these exemptions is that the parent company gives a guarantee under section 394C or section 479C (as appropriate).

If such guarantee is given we consider that the following disclosure, probably in the note detailing the listing of subsidiaries, would be made: 'The company has guaranteed the liabilities of the following subsidiaries in order that they qualify for the exemption from [preparing individual financial statements/audit] under Section [394A/479A] of the Companies Act 2006 in respect of the year ended 31 December 2021:

[insert list of the relevant subsidiaries].'

In addition we would expect that the contingent liability note would include the following disclosure: 'As disclosed in Note x, [some of] the company's subsidiaries have taken advantage of the exemption available under Section [394A/479A] of the Companies Act 2006 in respect of the requirement [to prepare individual financial statements/for audit]. As a condition of the exemption, the company has guaranteed the year-end liabilities of the relevant subsidiaries until they are settled in full. The liabilities of the subsidiaries at the year-end was £x,xxx,000 (2020:£x,xxx,000).

## 28. Capital and other commitments

At 31 December, the group had the following capital commitments:

		2021	2020
SI 2008/410 1 Sch 63(2), 17.32(b)	Contracts for future capital expenditure not provided in the financial statements – Property, plant and equipment	343	628

The group had the following future minimum lease payments under non-cancellable operating leases for each of the following periods:

20.16	Payments due	2021	2020
	Not later than one year	843	839
	Later than one year and not later than five years	2,829	2,511
	Later than five years	9,246	8,053
		12,918	11,403
CA06 s410A	The group had no other off-balance sheet arrangemer	nts.	

#### Company

The company had no capital or other commitments at 31 December 2021 (2020: £nil).

-	29.Related party transactions
-	Group
	Transactions with associates:
33.9	During the year the group provided warehousing and distribution services to Click & Deliver Limited, the group's associate. Revenue of £540,000 (2020: £425,000) was recognised. At the year-end £35,000 (2020: £47,000) was outstanding and included within debtors. The receivable is unsecured, no guarantees have been received and is due in 30 days (2020: 30 days).
	In addition, the group has guaranteed certain of its associates' borrowings, see note 27.
	Transactions with key management personnel:
33.9, 33.13	During 2021 the group sold a property with a carrying value of £134,000 to Midland Canals Limited, a company owned by Mr D Waters, a director of the company, for £165,000, its fair value as determined by external valuers. No amounts were outstanding at the year-end.
	See note 8 for disclosure of the directors' remuneration and key management compensation.
	Company
33.1A	Other than the transactions disclosed in note 8, the company's other related party transactions were with wholly owned subsidiaries.
	Commentary
33.1A	Transactions with an entity prior to acquisition are not disclosable where the entity was not a related party prior to the acquisition. Post-acquisition transactions are eliminated on consolidation so are not disclosed by the group. Post-acquisition transactions between the company and any non-wholly owned subsidiaries are disclosable.
	Transactions with an entity disposed of are not required to be disclosed where the related party relationship ceases on disposal. Transactions with a subsidiary before its disposal are eliminated on consolidation and not disclosed in the consolidated financial statements. Pre-disposal transactions between the company and any non– wholly owned subsidiaries are disclosable.
33.13	An entity shall not state that related party transactions were made on an arm's length basis unless such terms can be substantiated.
	30. Controlling party
-	Group and company
33.5	The company is owned by a number of private shareholders and companies, none of whom own more than 20% of the issued share capital of the company.
	Accordingly there is no parent entity nor ultimate controlling party.
	Commentary
33.5, SI 2008/410 4 Sch 8,9	Under paragraph 33.5 of FRS 102, an entity should disclose the name of its parent and, if different, the ultimate controlling party. If neither the parent nor the ultimate controlling party produce consolidated financial statements for public use, the name of the next most senior parent that does so should be disclosed. SI 2008/410 requires the country of incorporation, if outside of the UK, to be stated.
	SI 2008/410 also requires an entity to disclose;

- the names of the parents of the largest and smallest groups to include the entity,
- if those parents are incorporated outside of the UK, the country of incorporation;
- if those parents are unincorporated, the address of the principal place of business; and
- the addresses from which the consolidated financial statements of the parents can be obtained (if available to the public).

### 31. Events after the reporting period

#### Group

**32.10** On 28 February 2022, the group acquired the entire share capital of Better Late Than Never Limited, which operates a chain of stores in the North of England. The total consideration was £8,570,000. £5,000,000 was paid immediately in cash, £3,500,000 settled through issuing 300,000 shares and expenses of £70,000 were capitalised.

### 32. Business combinations

### Group

**19.25(a),(b),(c)** On 22 September 2021, the group acquired control of Chain Stores Limited through the purchase of 60% of the share capital for total consideration of £27,950,000.

Chain Stores Limited has department stores in Bath, Birmingham, Bristol, Nottingham, Oxford and Warwick.

Prior to the acquisition the group had minimal presence in these markets. As a result of the acquisition, the group expects to increase its sales to customers in these towns, both through internet and store sales. The goodwill of £21,697,000 arising from the acquisition is attributable to the acquired customer base and economies of scale expected from combining the operations into the group.

# **19.25(g)** Management have estimated the useful life of the goodwill to be 10 years. The acquired stores are all established in their local markets and have a long track record of stable revenue. The amortisation period is mitigated by the growth of internet shopping which lowers the barriers to entry for new competitors and is reducing sales for traditional high street retailers.

The following table summarises the consideration paid by the group, the fair value of assets acquired, liabilities assumed and the non-controlling interest at the acquisition date.

# Consideration at 22 September 2021

19.25(d)	Cash	16,000
19.25(d)	Equity instruments (0.3m ordinary shares)	3,250
19.25(d)	Deferred consideration	5,000
19.12, 19.25(d)	Contingent consideration	3,430
19.11(b)	Directly attributable costs	270
	Total consideration	27,950
	For cash flow disclosure purposes the amounts are disclosed as	s follows:
	Cash consideration	16,000
	Directly attributable costs	270
	Less	16,270

Cash and cash equivalents acquired	(607)
Net cash outflow	15,663

Examples of intangible assets that would not normally satisfy criteria include customer lists, customer relationships and unprotected trade secrets secret recipes or formulas), because no contractual or legal right exists that would ge expected future economic benefits.	e FRC nditions include legally fy all three s (such as		
	33. Non-controlling interests			
	Group			
DV	The movement in non-controlling interests was as follows:			

	Note	2021	2020
At 1 January		3,359	4,572
Acquisition of remaining interest in Almost Everything Limited		_	(2,534)
Acquisition of Chain Stores Limited	32	4,168	-
Total comprehensive income attributable to non– controlling interests		3,472	3,955
Dividends paid to non-controlling interest		(2,298)	(2,634)
At 31 December		8,701	3,359

On 28 April 2020 the group acquired the remaining 25% of the issued shares of Almost Everything Limited for a purchase consideration of £4,435,000. The group now holds 100% of the equity share capital of Almost Everything Limited. At the date of acquisition the group derecognised the carrying amount of the non– controlling interest of £2,534,000 and recorded a decrease in equity attributable to owners of the parent of £1,901,000.

# **UK GAAP Limited**

# Year ended 31 December 2021

# Example annual report under UK GAAP (FRS 102)

### Introduction

The example annual report that follows includes the financial statements of UK GAAP Limited, a wholly-owned private subsidiary company that reports under FRS 102.

UK GAAP Limited is a fictitious company. Its annual report has been prepared for illustrative purposes only and shows the disclosures and formats that might be expected for a subsidiary company that prepares its financial statements in accordance with the requirements of Part 15 of the Companies Act 2006 and 'The Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008' (SI 2008/410).

These financial statements also include voluntary disclosures that illustrate certain aspects of disclosure under FRS 102. A qualifying entity under FRS 102 would be able to take advantage of the disclosure exemptions under paragraph 1.12 of FRS 102. As it is not a small company (as defined in section 382 of the Companies Act 2006), UK GAAP Limited is required to prepare a strategic report but the disclosure requirements are less onerous than those that would apply to a quoted company.

### **Guidance and information**

References to source material are given in the left-hand margin. New disclosure requirements are shaded in pink. PwC commentary on matters of interest is shaded grey.

The intention is not to show all conceivable disclosures, so this annual report should not be used as a checklist. The illustrative disclosures are not necessarily applicable for all private companies.

This illustrative annual report does not cover the following sections of FRS 102 (amongst other items):

Consolidated financial statements (Section 9)	Foreign currency translation (Section 30)
Investment properties (Section 16)	Hyperinflation (Section 31)
Business combinations and goodwill (Section 19)	Specialised activities (Section 35)
Government grants (Section 24)	Discontinued activities
Impairment of assets (Section 27)	Exceptional items
	Long term contracts (Section 23)

At the time of writing, the biggest impact on the financial statements of entities all around the world continues to be related to the COVID-19 pandemic and the impairment of assets, including receivables, information about going concern and borrowing profiles will likely still be a focus of stakeholders as at 31 December 2021. Entities will need consider to what extent they need to explain the impact on their business and the key assumptions made. However, as the impact will differ from entity to entity, we are referring our readers to our dedicated web site which provides many useful resources, including certain disclosure examples, and continues to be updated to reflect latest developments. This website also discusses the accounting for COVID-19-related rent concessions by lessees. We have therefore not illustrated any related disclosures in this publication.

Further guidance on the UK law and accounting requirements affecting companies' financial statements is contained in PwC's Manual of Accounting – UK GAAP.

PwC's Manual of Accounting – Narrative Reporting provides additional guidance on the requirements for strategic, corporate governance, remuneration and directors' reports.

# **UK GAAP Limited**

Annual Report for the year ended 31 December 2021

# Strategic report

	Strategic report for the year ended 31 December 2021
CA06 s414A	The directors present their strategic report on the company for the year ended 31 December 2021.
	Commentary
CA06 s414A(3),	A summary of the FRC Guidance on the Strategic report is included as an appendix to the strategic report section of the consolidated illustrative financial statements of UK GAAP Group Limited
414C(13)	This section reflects the strategic report requirements contained in section 414C of the Companies Act 2006 but it does not reflect the non-financial reporting requirements contained in section 414CB. Section 414CB applies to companies with more than 500 employees (or companies that head a group that has over 500 employees) where the company is:
	• a traded company;
	a banking company;
	an authorised insurance company; or
	a company carrying on insurance market activity.
	Most companies reporting under FRS 102 will not meet the above criteria so theywill not be required to comply with non-financial reporting requirements of section 414CB. FRS 102 reporters that are required to comply with those requirements should refer to the strategic report section of the IFRS for the UK illustrative financial statements.
	Review of the business
CA06	The report should include a review of the business containing:
s414C(2)(a) CA06	a fair review of the business of the company; and
s414C(2)(b)6	a description of the principal risks and uncertainties facing the company.
	Commentary
FRC Press Notice 108	Where non-GAAP numbers are disclosed, it should be clear that these differ from the GAAP numbers; the equivalent GAAP number should be disclosed; and there should be a reconciliation between the GAAP and non-GAAP numbers, together with relevant comment. This disclosure might be necessary to ensure that the annual report is fair, balanced and understandable.
	The information that is required to be included in the strategic report may be included elsewhere in the annual report and incorporated into the strategic report by cross– reference. We consider that this cross-referencing should be specific.
CA06	The review is a balanced and comprehensive analysis of:
s414C(3)	• the development and performance of the business of the company during the financial year; and
	<ul> <li>the position of the company at the end of the year, consistent with the size and complexity of the business.</li> </ul>
CA06 s414C(4)	The review must, to the extent necessary for an understanding of the development, performance or position of the business of the company, include:
	analysis using financial key performance indicators; and
	<ul> <li>where appropriate, analysis using other key performance indicators, including information relating to environmental matters and employee matters.</li> </ul>

	Commentary
CA06 s414C(6)	For medium sized companies, where these indicators relate to non-financial information, disclosure is not required.
	General
CA06 s414C(11) SI 2008/410 7 Sch 1A	Any matters that are directors' report disclosure requirements but considered by the directors to be of strategic importance to the company. (If this is the case, the directors' report includes a cross-reference to the relevant information in the strategic report.)
CA06 s414C(12)	The report must, where appropriate, include references to, and additional explanations of, amounts included in the financial statements of the company.
CA06 s414C(14)	The report need not disclose any information about impending developments or matters in the course of negotiation if, in the opinion of the directors, such disclosure would be seriously prejudicial to the interests of the company.
	Section 172(1) statement
CA06 s414CZA	The strategic report must include a statement (a 'section 172(1) statement') which describes how the directors have had regard to the matters set out in section 172(1)(a) to (f) when performing their duty under section 172.
	Commentary
	The Section 172(1) statement does not apply if the company qualifies as medium– sized or smaller in relation to that financial year (see sections 465 to 467 of the Companies Act 2006).
CA06 s414D(1)	By order of the board
CA06	W Jong
s414D(1)	Company Secretary
	30 April 2022
	Commentary
CA06 s414D(1)	The strategic report has to be signed by the company secretary or a director after it has been approved by the board of directors. The copy of the strategic report that is delivered to the Registrar of Companies must be manually signed by the company secretary or a director.

# Directors' report

	Directors' report for the year ended 31 December 2021
CA06 s415(1)	The directors present their report and the audited financial statements of the company for the year ended 31 December 2021.
	Future developments
SI 2008/410 7 Sch 7(1)(d)	The directors' report should contain an indication of the likely future developments in the company's business.
	Commentary
	This disclosure is likely to be relevant to the strategic report. It could be included in the strategic report and incorporated into the directors' report by cross reference.
	Dividends
CA06 s416(3)	Details of dividends paid and recommended should be included.
	Political donations and political expenditure
SI 2008/410 7 Sch 3	If the company has made any donations to a registered political party, other political organisation in the UK or any independent election candidate, or if it incurred UK political expenditure exceeding £2,000 in the financial year, the directors' report should disclose:
	UK donations – the name of the political party and total amount given per party by the entity
	UK political expenditure – total amount incurred in the financial year by the company
SI 2008/410 7 Sch 4	Total contributions to non-UK political parties should be disclosed in aggregate. (There is no threshold for this disclosure.)
	Commentary
	Wholly-owned subsidiaries of companies incorporated in the UK are exempt from these disclosures.
	Changes have been made to UK company law as it applies to corporate reporting in order to address issues arising from the UK's exit from the European Union. SI 2019/145 replaces several references to the EU or EEA with references to the UK. The impact of doing so includes a change to the disclosure of political contributions.
	Disclosures required in the directors' report in respect of contributions to non-EU political parties will be required in respect of non-UK political parties.
	The changes apply to financial years beginning on or after implementation period completion day (that is, 31 December 2020). For financial years that begin before, but end on or after, this day, the relevant UK law applies as if the UK continued to be a member State.
	Financial instruments
SI 2008/410 7 Sch 6	Where material for the assessment of the assets, liabilities, financial position and profit or loss of the company, the directors' report must contain an indication of:
	<ul> <li>the financial risk management objectives and policies of the entity, including the policy for hedging each major type of forecasted transaction for which hedge accounting is used; and</li> </ul>
	the exposure of the entity to price risk, credit risk, liquidity risk and cash flowrisk.
	Commentary
	This disclosure is not required where such information is not material for the assessment of the entity's assets, liabilities, financial position and profit or loss.

	Directors				
CA06 s416(1)(a)	The names of all persons who were directors during any part of the period should be provided.				
DV	Changes in directors since the end of the financial year and the dates of any appointments and/or resignations of directors occurring during the financial year should be provided.				
DV	Information regarding the retirement of the directors at the AGM and whether they offer themselves for election should be disclosed.				
	Qualifying third-party and pension scheme indemnity provisions				
CA06 s236	If a qualifying third-party indemnity provision and/or qualifying pension scheme indemnity provision (whether made by the company or otherwise) has been in place for one or more directors of the company, the directors' report should state that fact. If the company has made such provisions for the benefit of the directors of an associated company, the directors' report should state that fact. These disclosures are required in respect of those provisions in force at any time during the financial year and those in force at the date of approval of the directors' report.				
	Research and development				
SI 2008/410 7 Sch 7(1)(a)	The directors' report should provide an indication of the company's research and development activities.				
DV	It is recommended that a statement is included with regard to the charge to the income statement for the year (which should be separately disclosed in the notes to financial statements).				
	Post balance sheet events				
SI 2008/410 7 Sch 7(1)(c)	The directors' report should include particulars of any important events affecting the company since the year end.				
	Commentary				
	Similar to the disclosure on future developments, this disclosure is likely to fit well with the strategic report. It might therefore be appropriate to include therein and cross reference.				
	Employees				
SI 2008/410 7 Sch 10(3)	A statement should be included as to the UK policy for giving full and fair consideration to applications for employment that disabled people make to the company, the policy for employment, training, career development and promotion of disabled people and for the continuing employment and training of employees who have become disabled while employed by the company.				
	Commentary				
	This disclosure is required if the average number of employees during the year and working within the UK exceeds 250.				
	Employee engagement statement				
SI 2008/410	The directors' report must contain a statement:				
7 Sch 11 (as amended by SI 2018/860	<ul> <li>describing the action that has been taking during the financial year to introduce, maintain or develop arrangements aimed at:</li> </ul>				
Reg 13)	<ul> <li>providing employees systematically with information on matters of concern to them as employees;</li> </ul>				
	<ul> <li>consulting employees or their representatives on a regular basis so that the views of employees can be taken into account in making decisions which are likely to affect their interests;</li> </ul>				
	<ul> <li>encouraging the involvement of employees in the company's performance through an employees' share scheme or by some other means; and</li> </ul>				
	<ul> <li>achieving a common awareness on the part of all employees of the financial</li> </ul>				
	<ul> <li>and economic factors affecting the performance of the company; and</li> </ul>				

SI 2008/410 7 Sch 11 (as amended by SI 2018/860 Reg 13)	<ul> <li>summarising:         <ul> <li>how the directors have engaged with employees; and</li> <li>how the directors have had regard to employee interests, and the effect of that regard, including on the principal decisions taken by the company during the financial year.</li> </ul> </li> <li>Commentary</li> </ul>
	This disclosure is required if the average number of employees during the year and working within the UK exceeds 250.
	Statement of engagement with suppliers, customers and others in a business relationship with the company
SI 2008/410 7 Sch 11B (as inserted by SI 2018/860 Reg 13)	The directors' report must contain a statement summarising how the directors have had regard to the need to foster the company's business relationships with suppliers,
	Commentary
	These disclosures are applicable to a company that exceeds two of the following three thresholds (subject to smoothing arrangements where circumstances change):
	• £36 million turnover;
	£18 million total balance sheet assets; and
	250 employees.
	Branches outside the UK
SI 2008/410 7 Sch 7(1)(d)	The directors' report should disclose the existence of any branches that operate outside of the UK.
	Statement of corporate governance arrangements
SI 2008/410	The directors' report must include a statement which states:
7 Sch 26(1)&(2)	<ul> <li>which corporate governance code, if any, the company applied in the financial year;</li> </ul>
	<ul> <li>how the company applied any corporate governance code reported under (a); and</li> </ul>
	<ul> <li>if the company departed from any corporate governance code reported (a), the respects in which it did so, and its reasons for so departing.</li> </ul>
	If the company has not applied any corporate governance code for the financial year, the statement of corporate governance arrangements must explain the reasons forthat decision and explain what arrangements for corporate governance were applied for that year.
	Commentary
	<ul> <li>This disclosure applies to all companies that satisfy either or both of the following conditions:</li> <li>more than 2,000 employees; and</li> <li>a turnover of more than £200 million, and a balance sheet of more than £2 billion</li> </ul>
	A Coalition Group, appointed by BEIS, and with secretarial support from the FRC, has developed a set of principles for corporate governance reporting by large private companies ('Wates Principles'). These are not mandatory and companies are free to explain their own arrangements, as set out in the regulations above.

# The Wates Corporate Governance Principles for Large Private Companies

Wates Principles – Introduction	A company that adopts the Wates Principles should follow them using an 'apply and explain' approach in a way that is most appropriate for their particular organisation. Accordingly, boards should apply each principle by considering them individually within the context of the company's specific circumstances. They should then be able to explain in their own words how they have addressed them in the governance practices.			
Wates Principle 1	Purpose and leadership: An effective board develops and promotes the purpose of a company, and ensures that its values, strategy and culture align with that purpose.			
Wates Principle 2	Board composition: Effective board composition requires an effective chair and a balance of skills, backgrounds, experience and knowledge, with individual directors having sufficient capacity to make a valuable contribution. The size of a board should be guided by the scale and complexity of the company.			
Wates Principle 3	Director responsibilities: The board and individual directors should have a clear understanding of their accountability and responsibilities. The board's policies and procedures should support effective decision-making and independent challenge.			
Wates Principle 4	Opportunity and risk: A board should promote the long-term sustainable success of the company by identifying opportunities to create and preserve value, and establishing oversight for the identification and mitigation of risks.			
Wates Principle 5	Remuneration: A board should promote executive remuneration structures aligned to the long-term sustainable success of a company, taking into account pay and conditions elsewhere in the company.			
Wates Principle 6	Stakeholder relationships and engagement: Directors should foster effective stakeholder relationships aligned to the company's purpose. The board is responsible for overseeing meaningful engagement wit stakeholders, including the workforce, and having regard to their views when taking decisions.			
	Statement of directors' responsibilities			
	The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation.			
	Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland', and applicable law).			
	Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing the financial statements, the directors are required to:			
	<ul> <li>select suitable accounting policies and then apply them consistently;</li> </ul>			
	<ul> <li>state whether applicable United Kingdom Accounting Standards, comprising FRS 102, have been followed, subject to any material departures disclosed and explained in the financial statements;</li> </ul>			
	<ul> <li>make judgements and accounting estimates that are reasonable and prudent; and</li> </ul>			
	<ul> <li>prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.</li> </ul>			
	The directors are also responsible for safeguarding the assets of the group and company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.			
	The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the group's and company's transactions and disclose with reasonable accuracy at any time the financial position of the group and company and enable them to ensure that the financial statements comply with the Companies Act 2006.			
	Directors' confirmations			
CA06 s418(2)	In the case of each director in office at the date the Directors' Report is approved:			

- so far as the director is aware, there is no relevant audit information of which the company's auditors are unaware; and
- they have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of that information.

#### Independent auditors

The auditors, PricewaterhouseCoopers LLP, have indicated their willingness to continue in office and a DV (see also **CA06** resolution concerning their re-appointment will be proposed at the Annual General Meeting. s489(1),(2)) By order of the board CA06 s419(1) W Jong Company secretary 30 April 2022 Commentary CA06 s419(1) The directors' report must be signed by the company secretary or a director after it has been approved by the board of directors. The copy of the directors' report that is delivered to the Registrar of Companies must be manually signed by the company secretary or a director. Streamlined energy and carbon reporting ('SECR') SI 2018/1155 Certain unquoted companies have environmental reporting requirements related to UK energy use. The disclosures should be presented in the directors' report. Where energy use is of strategic importance to the company, disclosure of the relevant information could be included in the strategic report instead of the directors' report. Appropriate cross referencing in the directors' report will need to be made. There are exemptions available for all entities where they have low energy use (less than 40 MWh annually) or when information would be seriously prejudicial or not practical to obtain. General climate change reporting Another example of judgements that may need to be explained are judgements made by the entity about the possible impact of climate-related and other emerging business risks. Climate-related risks could have a significant impact on an entity's operations and financial performance and users of the financial statements are increasingly looking for evidence that the entity has incorporated climate risk factors when making estimates and judgements in the preparation financial statements. The accounting standards have an overarching requirement to disclose information that users need to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance. Therefore, in light of the current focus on, and impact of, climate change, entities should ensure that they have undertaken a rigorous assessment to provide all the relevant and material

information affecting the financial statements

# Independent auditors' report to the members of UK GAAP Limited

Warning: This audit report format was current at the date of going to print. However it may not be the most up-todate version. It should not be used without checking that it is the appropriate version, and in any case will need to be tailored to incorporate information specific to the entity being audited.

# Report on the audit of the financial statements

# Opinion

In our opinion, UK GAAP Limited's financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2021 and of its profit and cash flows for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland', and applicable law); and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report, which comprise: the balance sheet as at 31 December 2021; the profit and loss account, the statement of comprehensive income, the statement of cash flows, the statement of changes in equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

# **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (UK) ('ISAs (UK)') and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

# Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

# **Reporting on other information**

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic Report and Directors' Report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on our work undertaken in the course of the audit, the Companies Act 2006 requires us also to report certain opinions and matters as described below.

### Strategic report and Directors' report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic report and Directors' report for the year ended 31 December 2021 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic report and Directors' report.

## Responsibilities for the financial statements and the audit

### Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

## Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the company and industry, we identified that the principal risks of non-compliance with laws and regulations related to [XXX – No illustration provided as this has to be company specific], and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the financial statements such as the Companies Act 2006. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to [XXX]. Audit procedures performed included:

• [YYY - No illustration provided as this has to be company specific]

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

### Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

# Other required reporting

# **Companies Act 2006 exception reporting**

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- · we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been
  received from branches not visited by us; or
- · certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns; or
- a corporate governance statement has not been prepared by the company.

We have no exceptions to report arising from this responsibility.

John Smith (Senior Statutory Auditor) for and on behalf of PricewaterhouseCoopers LLP Chartered Accountants and Statutory Auditors London 30 April 2022

	Commentary			
5.2	An entity can present total comprehensive income under a single-statement or two			
	statement approach:			
	<ul> <li>Under the single-statement approach, it presents a single statement of comprehensive income, including all of its income and expense for the period.</li> </ul>			
	• Under the two-statement approach, it presents an 'income statement' (alternatively known as a 'profit and loss account'), presenting all items of profit or loss, and a separate 'statement of comprehensive income', that begins with total profit or loss for the period and also presents all items of other comprehensive income.			
5.5, 5.7	Under both approaches, the profit and loss section should be presented in accordance with the formats in SI 2008/410.			
5.9B	FRS 102 does not require the disclosure of 'operating profit', but it emphasises that where an entity chooses to present the amount, it should ensure that all operating-type items are appropriately included and it would be inappropriate to exclude items clearly related to operations (such as inventory write-downs, profits or losses on the sale of property, plant and equipment, investment property and intangible assets, and restructuring and relocation expenses).			
5.5A(a)	Components of other comprehensive income can be presented either: • net of related tax effects; or			
	• gross of the related tax effects, with one amount showing the aggregate income tax relating to those components.

### Commentary

SI 2008/410 1 Sch 1A An entity is permitted to adapt the detailed company law profit and loss account and balance sheet formats set out in SI 2008/410. This is subject to the condition that the information given is at least equivalent to that which would have been required by the use of the detailed company law formats. SI 2008/410 also requires that the presentation is in accordance with generally accepted accounting principles or practice (for an FRS 102 reporter, in accordance with FRS 102). Under FRS 102, a company can choose to present under the detailed company law formats contained in SI 2008/410 or in accordance with IAS 1. A company that presents its profit and loss account in accordance with IAS 1 must in addition to the IAS 1 line items, present 'profit or loss before taxation'.

Differences between the company law formats and the IFRS-type formats might result from:

- The definition of fixed assets (company law) and non-current assets (IFRS).
- The definition of current assets.
- The definitions of creditors falling due within, or after, one year (company law) and current/non-current liabilities (IFRS).
- Presentation of debtors falling due after more than one year within current assets (company law). Under IFRS, those items would be presented in non-current assets.

These illustrative financial statements are presented under the detailed company law formats.

**SI 2008/410 1 Sch 4** In the illustrative balance sheet above, items which are preceded by Arabic numbers in the detailed Companies Act formats have been combined (for example 'Tangible assets' or 'Creditors: amounts falling due within one year'), as doing so facilitates the assessment of the company's financial position and the individual amounts are disclosed in the notes. 'Post-employment benefits' and 'Provision for other liabilities' have not been combined although they may be combined.

	Net cash used in financing activities		(293)	(795)
	Net increase in cash and cash equivalents		182	397
	Cash and cash equivalents at the beginning of the year		873	476
	Cash and cash equivalents at the end of the year		1,055	873
20	Cash and cash equivalents consists of:			
	Cash at bank and in hand		330	260
	Short term deposits (included in current asset investments)		725	613
	Cash and cash equivalents		1,055	873

	Commentary
7.7, 7.8	An entity can present cash flows from operating activities using either:
	<ul> <li>the indirect method, where profit or loss is adjusted for the effects of changes during the period to working capital balances, non-cash transactions and items of income or expense associated with investing or financing cash flows; or</li> </ul>
	• the direct method, where major classes of gross cash receipts and payments are disclosed.
7.20	FRS 102 requires that the statement of cash flows includes information about the changes in 'Cash and cash equivalents', whereas the balance sheet includes an item for 'Cash at bank and in hand'. Where these amounts differ, an entity should present the components of cash and cash equivalents and a reconciliation of the amounts to the equivalent items presented in the balance sheet.

# Notes to the financial statements

	Commentary
SI 2008/410 1 Sch 42(2)	SI 2008/410 requires that notes are presented in the order in which, where relevant, the items to which they relate are presented in the balance sheet and in the profit and loss account.
	1. General Information
3.24(b)	UK GAAP Limited ('the company') designs, manufactures and sells shoes through a network of independent retailers. The company has manufacturing plants in the UK and sells primarily to the UK and the rest of Europe.
3.24(a)	The company is a private company limited by shares and is incorporated in the United Kingdom and registered in England. The address of its registered office is 16 Nice Walk Way, London.
	2. Statement of compliance
3.3, SI 2008/410 3 Sch 45	The financial statements of UK GAAP Limited have been prepared in compliance with United Kingdom Accounting Standards, including Financial Reporting Standard 102, 'The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland' ('FRS 102') and the Companies Act 2006.
	3. Summary of significant accounting policies
2,11, 8.5, 10.7	The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated. The company has adopted FRS 102 in these financial statements.
	Commentary
	These are the entity's separate financial statements. The company has not made any acquisitions of businesses so disclosures required by Section 19 of FRS 102, 'Business Combinations and Goodwill', are not included in these illustrative financial statements.
	a. Basis of preparation
3.8, 2.50	These financial statements are prepared on a going concern basis, under the historical cost convention, as modified by the revaluation of land and buildings and certain financial assets and liabilities measured at fair value through profit or loss.
8.7	The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4.
	Commentary
3.10	FRS 102 requires financial statements to be prepared annually. Where the reporting period changes and annual financial statements are presented for a period longer or shorter than one year the entity shall disclose (a) that fact; (b) the reason for using a longer or shorter period; and (c) the fact that the comparative amounts presented in the financial statements are not directly comparable.
	FRS 102 requires the entity to retain the presentation and classification of items from one period to the next unless (a) it is apparent, following a significant change in the entity's operations, that another presentation or classification would be more appropriate or (b) FRS 102, or another applicable FRS or FRC Abstract, requires a change in presentation.
3.11–3.13	When presentation or classification is changed comparative amounts shall be reclassified unless impracticable. When amounts are reclassified the entity shall disclose (a) the nature of the reclassification; (b) the amount of each item or class of items that is reclassified; and (c) the reason for the reclassification. If reclassification is impracticable the entity shall disclose the reason why.
3.14	FRS 102 requires comparative information for all amounts in the financial statements unless the standard permits or requires otherwise. Comparative information for narrative and descriptive information should be included when it is relevant for an understanding of the current period's financial performance.
	b. Going concern

3.9, 32.7A, 32.7B	The company meets its day-to-day working capital requirements through its bank facilities. The current economic conditions continue to create uncertainty over (a) the level of demand for the company's products; and (b) the availability of bank finance for the foreseeable future. The company's forecasts and projections, taking account a severe but plausible change in trading performance, show that the company should be able to operate within the level of its current facilities. After making enquiries, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. The company therefore continues to adopt the going concern basis in preparing its financial statements.
3.8	<b>Commentary</b> FRS 102 paragraph 3.8 requires financial statements to be prepared on a going concern basis but does not require an explicit statement. The Companies Act 2006 presumes that a company is carrying on business as a going concern.
3.9	FRS 102 requires management to make an assessment of the entity's ability to continue as a going concern taking into account all available information about the future, which is at least, but not limited to, twelve months from the date when the financial statements are authorised for issue. If there are material uncertainties that cast significant doubt upon the entity's ability to continue as a going concern, the entity shall disclose these uncertainties.
3.9	When an entity does not prepare financial statements on a going concern basis, it shall disclose that fact, together with the basis on which it prepared the financial statements and the reason why the entity is not regarded as a going concern.
	These illustrative financial statements include disclosures explaining that management consider the entity to be a going concern but this disclosure is not required by FRS 102 or by the law.
	The pervasive impacts of COVID-19 may result in some entities having material uncertainties over going concern. In such cases, relevant disclosures should be made in the financial statements. When management concludes that there are no material uncertainties, disclosure would be required in the financial statements to the extent that there is more judgment around the use of the going concern assumption and consideration of whether there is a material uncertainty. As noted in the introductory notes, these illustrative financial statements do not provide any illustrative examples or guidance on the impact of COVID-19 on the financial statements including going concern. Instead, readers can refer to our dedicated web site which provides many useful resources and is constantly updated to reflect latest developments.
	c. Exemptions for qualifying entities under FRS 102
1.8, 1.11(c)	The company has not taken advantage of any of the FRS 102 disclosure exemptions available to qualifying entities.
	Commentary
1.12	A qualifying entity is exempt from the following disclosure requirements:
	A reconciliation of the number of shares outstanding at the beginning and end of the period. [4.12(a)(iv)].
	The requirement to prepare a statement of cash flows. [Section 7 of FRS 102 and para 3.17(d)]. Certain financial instrument disclosures providing equivalent disclosures are included in the consolidated financial statements of the group in which the entity is consolidated. [11.42, 11.44, 11.45, 11.47, 11.48(a)(iii), 11.48(a)(iv), 11.48(b),
	11.48(c), 12.26, 12.27, 12.29(a), 12.29(b) and 12.29A]. This exemption is not available to financial institutions as defined in the FRS 102 Glossary. In addition the company law disclosures are still required.
	Certain disclosure requirements of Section 26 in respect of share-based payments provided that (i) for a subsidiary the share-based payment concerns equity instruments of another group entity; or (ii) for an ultimate parent the share-based payment concerns its own equity instruments and its separate financial statements are presented alongside the consolidated financial statements of the group; and in both cases the equivalent disclosures are included in the consolidated financial statements of the entity is consolidated. [26.18(b), 26.19–26.21, 26.23]. Key management personnel compensation in total. [33.7].
	A qualifying entity may take advantage of the disclosure exemptions above provided that:
	<ul> <li>it otherwise applies the recognition, measurement and disclosure requirements of FRS 102; and</li> </ul>

30.9	At each period end foreign currency monetary items are translated using the closing rate. Non-
30.7, 30.8	Foreign currency transactions are translated into the functional currency using the spot exchange rates at the dates of the transactions.
	currency. ii. Transactions and balances
30.2, 30.3, 30.26	<b>Commentary</b> The functional currency is the currency of the primary economic environment in which the entity operates. If the presentation currency is different from the functional currency, the entity states that fact and discloses the functional currency and the reason for using a different presentation
30.2–30.5, 20.26	The company's functional and presentation currency is the pound sterling.
	i. Functional and presentation currency
	e. Foreign currency
	The changes related to financial years apply to financial years beginning on or after implementation period completion day (that is, 31 December 2020). For financial years that begin before, but end on or after, this day, the relevant UK law applies as if the UK continued to be a member State.
	The impact of doing so includes a change to the exemptions from preparing consolidated accounts in sections 400 (intermediate parent companies owned by an EEA parent) and 401 (intermediate parent companies owned by a non-EEA parent). These exemptions are amended to refer to the company being owned by a UK parent and a non-UK parent respectively. A company that previously availed of the section 400 exemption from preparing consolidated financial statements because it had, say, a French parent (that is, an EEA parent) will not be able to claim the section 400 exemption (for companies with a UK parent) because its parent is outside the UK. But it will be able to avail of the same exemption under section 401 (for companies with a non-UK parent). The section 401 'equivalence test' for the parent's financial statements is now based on equivalence to UK requirements. We have yet to see how equivalence will be determined, but we would expect that this change will have no practical impact.
SI 2019/145	Changes have been made to UK company law as it applies to corporate reporting in order to address issues arising from the UK's exit from the European Union. SI 2019/145 replaces several references to the EU or EEA with references to the UK.
9.3 CA06 s400	The exemption from the requirement to prepare consolidated financial statements is subject to further conditions set out in the relevant sections of the Companies Act 2006.
	Commentary
9.27(a)	These financial statements are the company's separate financial statements.
9.3, 9.27A, CA06 s400	The company is a wholly owned subsidiary of UK GAAP Intermediate Holdings Limited and of its ultimate parent, UK GAAP Holdings Limited. It is included in the consolidated financial statements of UK GAAP Holdings Limited which are publicly available. The company is exempt by virtue of section 400 of the Companies Act 2006 from the requirement to prepare consolidated financial statements. The ultimate parent undertaking and the smallest and largest group to consolidate these financial statements is UK GAAP Holdings Limited. The address of the parent's registered office is New GAAP Towers, 3 The Square, London, WC2N 6RH.
	d. Consolidated financial statements
	required disclosures. If exemption from presenting a statement of cash flows is taken, we would expect the following wording, or similar, to be included: 'The company has taken advantage of the exemption, under paragraph 1.12(b), from preparing a statement of cash flows, on the basis that it is a qualifying entity and its ultimate parent company, UK GAAP Holdings Limited, includes the company's cash flows in its consolidated financial statements.'
	In these financial statements disclosure of item (b) is included in note 28. These illustrative financial statements include information in respect of the above exemptions to illustrate the
	• it discloses in the notes to its financial statements a brief summary of the disclosure exemptions adopted and the name of the parent of the group in whose consolidated accounts its financial statements are adopted and from where those financial statements may be obtained.

30.10, 30.11, 12.23	Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss account except where deferred in other comprehensive income as qualifying cash flow hedges.
	Foreign exchange gains and losses that relate to borrowings are presented in the profit and loss account within 'finance (expense)/income'. All other foreign exchange gains and losses are presented in the profit and loss account within 'other operating (losses)/gains'.
	f. Revenue recognition
23.3, 23,4, 29.20	Revenue is measured at the fair value of the consideration received or receivable and represents the amount receivable for goods supplied or services rendered, net of returns, discounts and rebates allowed by the company and value added taxes.
	The company bases its estimate of returns on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.
23.5	Where the consideration receivable in cash or cash equivalents is deferred, and the arrangement constitutes a financing transaction, the fair value of the consideration is measured as the present value of all future receipts using the imputed rate of interest.
23.10	The company recognises revenue when (a) the significant risks and rewards of ownership have been transferred to the buyer; (b) the company retains no continuing involvement or control over the goods; (c) the amount of revenue can be measured reliably; (d) it is probable that future economic benefits will flow to the entity; and (e) when the specific criteria relating to the each of company's sales channels have been met, as described below.
	i. Sale of goods – Wholesale
23.11–23.13, 23A.4, 23A.5, 23A.10, 23A.11	The company manufactures and sells a range of footwear products in the wholesale market. Sales of goods are recognised on delivery to the wholesaler, when the wholesaler has full discretion over the channel and price to sell the product and there is no unfulfilled obligation that could affect the wholesaler's acceptance of the product. Delivery occurs when the goods have been shipped to the location specified by the wholesaler, the risks of obsolescence or loss have been transferred to the wholesaler, the wholesaler has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed or the company has objective evidence that all criteria for acceptance have been satisfied.
23.3, 23.13	Goods sold to wholesalers are often sold with volume rebates and also with the provision for the wholesale customer to return faulty goods. Sales are measured at the prices specified in the sale contract, net of estimated volume rebates and returns. Volume rebates are assessed based on anticipated annual purchases. Accumulated experience is used to estimate and provide for the discounts and returns.
23.5	Sales are normally made with a credit term of 60 days. The element of financing is deemed immaterial and is disregarded in the measurement of revenue.
	ii. Sale of goods – retail
23.11	The company operates retail shops for the sale of footwear and certain related products. Sales of goods are recognised on sale to the customer, which is considered the point of delivery. Retail sales are usually by cash, credit or payment card.
23.13, 23A.10	Sales are made to retail customers with a right to return within 28 days, subject to certain conditions regarding the usage. Accumulated experience is used to estimate and provide for such returns at the time of sale.
23.9, 23A.16	The company does not operate any loyalty programmes.
	iii. Sale of goods – internet based transactions
23.10	The company sells goods via its website for delivery to the customer or 'click and collect' to its retail shops. Revenue is recognised when the risks and rewards of the inventory is passed to the customer. For deliveries to the customer this is the point of acceptance of the goods by the customer and for 'click and collect' this is the time of collection. Transactions are settled by credit or payment card.
23.13	Provision is made for credit notes based on the expected level of returns which is based on the historical experience of returns.
	iv. Sale of services
23.25–23.16, 23.21– 23.27	The company sells design services to other manufacturers. Revenue is recognised in the accounting period in which the services are rendered when the outcome of contract can be

	estimated reliably. The company uses the percentage of completion method based on the actual service performed as a percentage of the total services to be provided.
	v. Royalty income
23.28, 23.29(b)	The company earns royalties from other manufacturers in relation to the sale of products designed by the company. Royalty income is recognised on an accruals basis in accordance with the substance of the relevant agreement.
	vi. Interest income
23.28, 23.29(a)	Interest income is recognised using the effective interest rate method.
	vii. Dividend income
23.28, 23.29(c)	Dividend income is recognised when the right to receive payment is established.
23.1–23.2A	<b>Commentary</b> Section 23 of FRS 102 provides guidance on accounting for revenue for (a) the sale of goods; (b) the rendering of services; (c) construction contracts; and (d) the use by others of assets of the entity yielding interest, royalties or dividends. Revenue or other income arising from some transactions is dealt with in other sections. Section 23 excludes revenue or other income under insurance contracts which are dealt with in FRS 103.
	The appendix to Section 23 provides examples of revenue recognition under the principles in Section 23.
23.17–23.27	The company dealt with in these illustrative financial statements does not have revenue under construction contracts. Guidance on such contracts is given in paragraphs 23.17 to 23.27.
	g. Exceptional items
5.9	Exceptional items are disclosed separately in the financial statements where it is necessary to do so to provide further understanding of the financial performance of the company. They are items that are material either because of their size or their nature, and are considered non-recurring. These items are presented within the line items to which they best relate and reported separately as exceptional items. [Disclosure should be expanded and tailored to describe exceptional items that have been separately identified by the company.]
5.9–5.10A	<b>Commentary</b> FRS 102 does not specifically define exceptional items, although extraordinary items are defined in paragraph 5.10A. Paragraph 5.9 requires an entity to present additional line items, headings and subtotals when such a presentation is relevant to an understanding of the entity's financial performance. Paragraph 5.9A requires an entity to disclose items that are material. Paragraph 5.10A notes that the additional disclosures under paragraphs 5.9 and 5.9A are not extraordinary if they arise from the ordinary activities of the company.
	No exceptional items are disclosed in these illustrative financial statements. The above policy is included for illustrative purposes only.
	Guidance on presentation of alternative performance measures, including items described as 'non-recurring', is given in the FRC's Corporate Reporting Thematic Review on Alternative Performance Measures.
	Employee benefits
28.1	The company provides a range of benefits to employees, including annual bonus arrangements, paid holiday arrangements and defined benefit and defined contribution pension plans.
	i. Short term benefits
28.4, 28.39	Short term benefits, including holiday pay and other similar non-monetary benefits, are recognised as an expense in the period in which the service is received.
	ii. Defined contribution pension plans
28.10(a), 28.13	The company operates a defined contribution plan for its employees. A defined contribution plan is a pension plan under which the company pays fixed contributions into a separate entity. Once the contributions have been paid the company has no further payment obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet. The assets of the plan are held separately from the company in independently administered funds.
	iii. Multi-employer pension plan

28.11, 28.11A	The company is a member of a multi-employer plan. Where it is not possible for the company to obtain sufficient information to enable it to account for the plan as a defined benefit plan, it accounts for the plan as a defined contribution plan.
28.13A	Where the plan is in deficit and where the company has agreed, with the plan, to participate in a deficit funding arrangement the company recognises a liability for this obligation. The amount recognised is the net present value of the contributions payable under the agreement that relate to the deficit. This amount is expensed in profit or loss. The unwinding of the discount is recognised as a finance cost.
	Commentary
	Preparers should note that multi-employer pension schemes are different from group schemes and the accounting treatment and disclosures might also be different.
	iv. Defined benefit pension plan
28.10(b)	The company operates a defined benefit plan for certain employees. A defined benefit plan defines the pension benefit that the employee will receive on retirement, usually dependent upon several factors including age, length of service and remuneration. A defined benefit plan is a pension plan that is not a defined contribution plan.
28.14, 28.15	The liability recognised in the balance sheet in respect of the defined benefit plan is the present value of the defined benefit obligation at the end of the reporting date less the fair value of the plan assets at the reporting date.
28.17, 28.18	The defined benefit obligation is calculated using the projected unit credit method. Annually the company engages independent actuaries to calculate the obligation. The present value is determined by discounting the estimated future payments using market yields on high quality corporate bonds that are denominated in sterling and that have terms approximating the estimated period of the future payments ('discount rate').
28.15(b), 11.27–11.32	The fair value of plan assets is measured in accordance with the FRS 102 fair value hierarchy and in accordance with the company's policy for similarly held assets. This includes the use of appropriate valuation techniques.
28.23(d)	Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income. These amounts together with the return on plan assets, less amounts included in net interest, are disclosed as 'remeasurement of net defined benefit liability'.
28.23(a),(c)	The cost of the defined benefit plan, recognised in profit or loss as employee costs, except where included in the cost of an asset, comprises:
	• the increase in pension benefit liability arising from employee service during the period; and
	<ul> <li>the cost of plan introductions, benefit changes, curtailments and settlements.</li> </ul>
28.23(b), 28.24– 28.24B	The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is recognised in profit or loss as 'finance expense'.
	Commentary
28.20	FRS 102 does not require the entity to engage an independent actuary to calculate its defined benefit obligation. Nor does the standard require the valuation to be performed annually. Paragraph 28.20 of FRS 102 gives guidance where actuaries are not engaged annually. If this option is taken then we would expect appropriate disclosure in note 4 'critical accounting judgements and estimation uncertainty'. In addition if the plan is material the assumptions used and judgements made may also require disclosure in the critical accounting judgements and estimation uncertainty note.
28.15(b)	If the pension plan asset is an insurance policy that exactly matches the amount and timing of some or all of the benefits payable under the plan, the fair value of the asset is deemed to be the present value of the related obligation.
28.22	Where, at the reporting date, the present value of defined benefit obligation is less than the fair value of the plan assets the plan has a surplus. An entity shall recognise a surplus only to the extent that it is able to recover the surplus either through reduced contributions in the future or through refunds from the plan.
	Where a surplus is restricted no additional liabilities shall be recognised in respect of an agreement with the defined benefit plan to fund a deficit (such as a schedule of contributions).

	v. Annual bonus plan
28.8	The company operates an annual bonus plan for employees. An expense is recognised in the profit and loss account when the company has a legal or constructive obligation to make payments under the plan as a result of past events and a reliable estimate of the obligation can be made.
	Commentary
28.39	FRS 102 does not require disclosure about share term employee benefits. These illustrative financial statements voluntarily disclose this information.
	Other employee benefits are considered in Section 28 of FRS 102 including insured benefits (paragraph 28.12), termination benefits (paragraph 28.31) and other long- term benefits, including long-term paid absence, sabbatical leave, long-service benefits, long-term disability and deferred remuneration (paragraph 28.29). These are not included in these illustrative financial statements.
	vi. Share-based payment
26.16	Where the company participates in a share-based payment arrangement established by a group company, the company takes advantage of the alternative treatment allowed under Section 26 of FRS 102. The company recognises the share-based payment expense based on an allocation of its share of the group's total expense, calculated in proportion to the number of participating employees. The corresponding credit is recognised in retained earnings as a component of equity. Where the company is charged for the cost of share-based payment arrangements, the amounts are treated as a reduction in the capital contribution. If the amount charged is in excess of the share-based payment charge, the company treats the excess as a notional distribution and charges this to retained earnings.
	Commentary
26.16	The company has adopted the alternative treatment permitted by paragraph 26.16 where the company is a member of a group share-based payment arrangement. Under the alternative
	treatment, the company's expense is based on a reasonable allocation of the group's expense.
	treatment, the company's expense is based on a reasonable allocation of the group's expense. i Taxation

	Business combinations and Goodwill. Pa value of zero unless there is a commitme	ble assets other than goodwill and Section 19 considers ragraph 18.23 requires an entity to assume a residual ant by a third party to purchase the asset or there is an ual value can be determined by reference to the market asset's useful life.		
	These illustrative financial statements do assets acquired in a business combination	not include intangible development assets or intangible on, including goodwill.		
	k. Tangible assets			
17.15A, 17.10	Tangible assets are stated at cost (or deemed cost) less accumulated depreciation and accumulated impairment losses. Cost includes the original purchase price, costs directly attributable to bringing the asset to its working condition for its intended use, dismantling and restoration costs and borrowing costs capitalised.			
	i. Land & buildings			
17.8, 17.9, 17.15A	-	leasehold factories, retail outlets and offices. Land and ated depreciation and accumulated impairment losses.		
35.10(d)	Before transitioning to FRS 102, the company adopted a policy of revaluing freehold land and buildings and they were stated at their revalued amount less any subsequent depreciation and accumulated impairment losses. The difference between depreciation based on the deemed cost charged in the profit and loss account and the asset's original cost is transferred from revaluation reserve to retained earnings.			
	ii. Plant and machinery and fixtures, fittings, tools and equipment			
17.15A	Plant and machinery and fixtures, fittings, tools and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.			
	iii. Depreciation and residual values			
17.18–17.22, 17.31(b), (c)		other assets is calculated, using the straight-line method, s over their estimated useful lives, as follows:		
	Freehold buildings	over periods up to 50 years		
	Long leasehold property	over the shorter of 50 years and the remaining lease period.		
	Short leasehold property	over the period of the lease		
	Plant and machinery	10 – 15 years		
	Tools and equipment	3 – 8 years		
10.16, 17.19	The assets' residual values and useful lives are reviewed, and adjusted, if appropriate, at the end of each reporting period. The effect of any change is accounted for prospectively.			
	iv. Subsequent additions and major comp			
17.4	recognised as a separate asset, as appro	ctions, are included in the assets carrying amount or opriate, only when it is probable that economic benefits ompany and the cost can be measured reliably.		

17.6	The carrying amount of any replaced component is derecognised. Major components are treated as a separate asset where they have significantly different patterns of consumption of economic benefits and are depreciated separately over its useful life.
17.12	Repairs, maintenance and minor inspection costs are expensed as incurred.
	v. Assets in the course of construction
17.20	Assets in the course of construction are stated at cost. These assets are not depreciated until it is available for use and are reviewed for impairment at each reporting date.
	vi. Derecognition
17.28–17.30	Tangible assets are derecognised on disposal or when no future economic benefits are expected. On disposal, the difference between the net disposal proceeds and the carrying amount is recognised in profit or loss and included in 'other operating (losses)/gains'.
	Commentary
17.15B–17.15F	FRS 102 allows for the revaluation model to be applied to all items in a class of tangible assets whose fair value can be measured reliably. Revaluations should be made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value.
	I. Borrowing costs
25.2–25.2D	General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.
	Commentary
25.2	A company is not required to capitalise borrowing costs. This is an accounting policy choice.
	m. Leased assets
20.2, 20.3, 20.3A, 20.8	At inception the company assesses agreements that transfer the right to use assets. The assessment considers whether the arrangement is, or contains, a lease based on the substance of the arrangement.
	i. Finance leased assets
20.4–20.6	Leases of assets that transfer substantially all the risks and rewards incidental to ownership are classified as finance leases.
20.9, 20.10	Finance leases are capitalised at commencement of the lease as assets at the fair value of the leased asset or, if lower, the present value of the minimum lease payments calculated using the interest rate implicit in the lease. Where the implicit rate cannot be determined the company's incremental borrowing rate is used.
	Incremental direct costs, incurred in negotiating and arranging the lease, are included in the cost of the asset.
20.12	Assets are depreciated over the shorter of the lease term and the estimated useful life of the asset. Assets are assessed for impairment at each reporting date.
20.11	The capital element of lease obligations is recorded as a liability on inception of the arrangement. Lease payments are apportioned between capital repayment and finance charge, using the effective interest rate method, to produce a constant rate of charge on the balance of the capital repayments outstanding.
	ii. Operating leased assets
20.4, 20.7, 20.15	Leases that do not transfer all the risks and rewards of ownership are classified as operating leases. Payments under operating leases are charged to the profit and loss account on a straight-line basis over the period of the lease.
	iii. Lease incentives
	Incentives received to enter into a finance lease reduce the fair value of the asset and are included in the calculation of present value of minimum lease payments.
20.15A	Incentives received to enter into an operating lease are credited to the profit and loss account, to reduce the lease expense, on a straight-line basis over the period of the lease.
	Commentary

20.1	Section 20 of FRS 102 does not address certain specific arrangements including mineral and similar arrangements, licencing agreements, investment property measurement, biological assets and leases resulting in a loss.
20.15, 20.15A	Operating leases should be expensed on a straight-line basis unless another systematic basis is representative of the time pattern of the users benefit or the payments are structured to increase in line with expected inflation to compensate for the lessors expected cost inflationary cost increases. Similar consideration apply to related lease incentives.
	The company has no sale and leaseback transactions. These would be required to be considered under FRS 102 paragraphs 20.32 to 20.34.
	n. Impairment of non-financial assets
27.2–27.10, 17.24, 18.25	At each balance sheet date non-financial assets not carried at fair value are assessed to determine whether there is an indication that the asset (or asset's cash generating unit) may be impaired. If there is such an indication the recoverable amount of the asset (or asset's cash generating unit) is compared to the carrying amount of the asset (or asset's cash generating unit).
27.11 –27.20A	The recoverable amount of the asset (or asset's cash generating unit) is the higher of the fair value less costs to sell and value in use. Value in use is defined as the present value of the future cash flows before interest and tax obtainable as a result of the asset's (or asset's cash generating unit's) continued use. These cash flows are discounted using a pre-tax discount rate that represents the current market risk-free rate and the risks inherent in the asset.
27.21–27.23, 27.6	If the recoverable amount of the asset (or asset's cash generating unit) is estimated to be lower than the carrying amount, the carrying amount is reduced to its recoverable amount. An impairment loss is recognised in the profit and loss account, unless the asset has been revalued when the amount is recognised in other comprehensive income to the extent of any previously recognised revaluation.
	Thereafter any excess is recognised in profit or loss.
27.28–27.31	If an impairment loss is subsequently reversed, the carrying amount of the asset (or asset's cash generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the revised carrying amount does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised in prior periods. A reversal of an impairment loss is recognised in the profit and loss account.
	Commentary
27.24–27.27	There are additional requirements for the impairment of goodwill. Additional requirements for the impairment of goodwill are addressed in paragraphs 27.24 to 27.27 of FRS 102.
	As the company does not have goodwill, a policy is not applicable.
	o. Investments
	i. Investment in subsidiary company
9.26, 9.27(b)	Investment in subsidiary company is held at cost less accumulated impairment losses.
	ii. Investment in associate
14.4(a), 9.27(b)	Investment in associate is held at cost less accumulated impairment losses.
	Commentary
9.26	FRS 102 allows a parent entity to select and accounting policy for accounting for its investments in subsidiaries, associates and jointly controlled entities. The parent can measure the investment:
	at cost less impairment;
	at fair value with changes recognised in other comprehensive income; or
	at fair value with changes recognised in profit or loss.
	The same accounting policy should apply for all investments in a single class (subsidiaries, associates or jointly controlled entities), but the entity can use different policies for different classes.
SI 2008/410 1 Sch 36	The Companies Act 2006 does not permit investments in subsidiaries to be carried at fair value through profit or loss.
	p. Inventories

13.4, 13.20	Inventories are stated at the lower of cost and estimated selling price less costs to complete and sell. Inventories are recognised as an expense in the period in which the related revenue is recognised.
13.18, 13.6–13.9, 13.11, 13.22(a)	Cost is determined on the first-in, first-out (FIFO) method. Cost includes the purchase price, including taxes and duties and transport and handling directly attributable to bringing the inventory to its present location and condition. The cost of manufactured finished goods and work in progress includes design costs, raw materials, direct labour and other direct costs and related production overheads (based on normal operating capacity).
13.19, 27.2–27.4	At the end of each reporting period inventories are assessed for impairment. If an item of inventory is impaired, the identified inventory is reduced to its selling price less costs to complete and sell and an impairment charge is recognised in the profit and loss account. Where a reversal of the impairment is recognised the impairment charge is reversed, up to the original impairment loss, and is recognised as a credit in the profit and loss account.
13.16	<b>Commentary</b> An entity may use techniques such as the standard cost method, the retail method or most recent purchase price if the result approximates cost.
	q. Cash and cash equivalents
7.2	Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.
	Commentary
7.2	Bank overdrafts are normally considered financing activities similar to borrowings. However if they are repayable on demand and form an integral part of an entity's cash management, bank overdrafts are a component of cash and cash equivalents.
	r. Provisions and contingencies
	i.Provisions
21.4	Provisions are recognised when the company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount of the obligation can be estimated reliably.
21.7(a)	Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.
	In particular:
21.11C, 21.11D	• restructuring provisions are recognised when the company has a detailed, formal plan for the restructuring and has raised a valid expectation in those affected by either starting to implement the plan or announcing its main features to those affected and therefore has a legal or constructive obligation to carry out the restructuring; and
21.11B	provision is not made for future operating losses.
21.7, 21.11	Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as a finance cost.
	ii. Contingencies
21.12	Contingent liabilities are not recognised. Contingent liabilities arise as a result of past events when (i) it is not probable that there will be an outflow of resources or that the amount cannot be reliably measured at the reporting date or (ii) when the existence will be confirmed by the occurrence or non-occurrence of uncertain future events not wholly within the company's control. Contingent liabilities are disclosed in the financial statements unless the probability of an outflow of resources is remote.
21.13, 21.16	Contingent assets are not recognised. Contingent assets are disclosed in the financial statements when an inflow of economic benefits is probable.
29.23, 21.13	<b>Commentary</b> Provisions include deferred tax liabilities. The accounting policy for deferred taxation is included in the taxation accounting policy note. The recognition criteria for contingent assets are different from those for contingent liabilities.

	s. Financial instruments
11.2, 12.2(a)	The company has chosen to adopt the Sections 11 and 12 of FRS 102 in respect of financial instruments.
	i. Financial assets
11.13, 11.40	Basic financial assets, including trade and other receivables, cash and bank balances and investments in commercial paper, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest.
11.14(a), 11.15–11.20	Such assets are subsequently carried at amortised cost using the effective interest method.
11.14, 11.21, 11.25	At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value
	of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.
11.26	If there is a decrease in the impairment loss arising from an event occurring after the impairment was recognised, the impairment is reversed. The reversal is such that the current carrying amount does not exceed what the carrying amount would have been had the impairment not previously been recognised. The impairment reversal is recognised in profit or loss.
11.11, 11.40, 12.7	Other financial assets, including investments in equity instruments which are not subsidiaries, associates or joint ventures, are initially measured at fair value, which is normally the transaction price.
12.8	Such assets are subsequently carried at fair value and the changes in fair value are recognised in profit or loss, except that investments in equity instruments that are not publicly traded and whose fair values cannot be measured reliably are measured at cost less impairment.
11.33	Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.
	ii. Financial liabilities
11.9, 11.10, 11.13, 11.40	Basic financial liabilities, including trade and other payables, bank loans, loans from fellow group companies and preference shares that are classified as debt, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest.
11.13–11.20	Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.
	Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.
11.8, 11.9, 11.13, 22.3, 22.3A	Preference shares, which result in fixed returns to the holder or are mandatorily redeemable on a specific date, are classified as liabilities. The dividends on these preference shares are recognised in the profit and loss account as interest expense.
4.7. 11.10, 11.13	Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.
11.11	Derivatives, including interest rate swaps and forward foreign exchange contracts, are not basic financial instruments.
12.7, 12.8	Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. Changes in the fair value of derivatives are recognised in profit or loss in finance costs or income as appropriate.
	The company does not currently apply hedge accounting for interest rate and foreign exchange derivatives.

11.36	Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires.
	iii. Offsetting
11.38A, 12.25B	Financial assets and liabilities are offset and the net amounts presented in the financial statements when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.
	Commentary
	These illustrative financial statements present certain basic financial instruments under Section 11 of FRS 102 and some examples of other financial instruments under Section 12. Entities should evaluate the contractual terms and conditions of financial instruments and consider the scope requirements of Sections 11 and 12 when evaluating such instruments. Paragraphs 11.2 and 12.2 give an accounting policy choice for financial instruments namely:
	apply the provisions of FRS 102 in full; or
	<ul> <li>apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of FRS 102; or</li> </ul>
	• apply the recognition and measurement provisions of IFRS 9 and/or IAS 39 (as amended following the publication of IFRS 9) and the disclosure requirements of FRS 102.
	t. Share capital
22.3, 22.7–22.10	Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from the proceeds.
	u. Distributions to equity holders
6.3(c)(iii), 32.8	Dividends and other distributions to company's shareholders are recognised as a liability in the financial statements in the period in which the dividends and other distributions are approved by the company's shareholders. These amounts are recognised in the statement of changes in equity.
	Commentary
	Directors can propose final dividends to be approved by members. Dividends become a legally binding liability when a private company's members' written resolution is passed, regardless of the date on which it is to be paid. A proposed unapproved final dividend is not a legal obligation to shareholders and is not recognised as a liability at the balance sheet date.
	v. Related party transactions
33.1A	The company discloses transactions with related parties which are not wholly owned with the same group. It does not disclose transactions with its parent or with members of the same group that are wholly owned.
	Commentary
1.12(e), 33.7A	These illustrative financial statements do not take advantage of the exemption from disclosing key management personnel compensation.
	4. Critical accounting judgements and estimation uncertainty
8.6, 8.7	Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.
	a. Critical judgements in applying the entity's accounting policies
	i. Multi-employer defined benefit pension scheme
	Certain employees participate in a multi-employer defined benefit pension scheme with other companies in the region. In the judgment of the directors, the company does not have sufficient information on the plan assets and liabilities to be able to reliably account for its share of the defined benefit obligation and plan assets. Therefore, the scheme is accounted for as a defined contribution scheme, see note 20 for further details.
	ii. Share-based payments

The company's employees have been granted share options by the ultimate parent company, UK GAAP Holdings Limited. The company makes use of the exemption in Section 26 of FRS 102 to account for the expense based on a reasonable allocation of the parent company's total expense. The company has calculated its allocation of the parent company's total expense based on the number of participating employees in the company compared to the number of participating employees in the group.

The company also considered an allocation based on the relative remuneration cost of the relevant employees and considered that this gave rise to no significant differences in the allocated costs.

#### b. Critical accounting estimates and assumptions

The company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

i. Useful economic lives of tangible assets (note 13)

The annual depreciation charge for tangible assets is sensitive to changes in the estimated useful economic lives and residual values of the assets. The useful economic lives and residual values are re-assessed annually. They are amended when necessary to reflect current estimates, based on technological advancement, future investments, economic utilisation and the physical condition of the assets. The remaining useful economic life of the main production plant asset is considered a source of significant estimation uncertainty. See note 13 for the carrying amount of the asset, the useful economic life assumed, and sensitivity analysis.

ii. Defined benefit pension scheme (note 20)

The company has an obligation to pay pension benefits to certain employees. The cost of these benefits and the present value of the obligation depend on a number of factors, including; life expectancy, salary increases, asset valuations and the discount rate on corporate bonds. Management estimates these factors in determining the net pension obligation in the balance sheet. The assumptions reflect historical experience and current trends. For details of assumptions adopted, see note 20.

#### Commentary

Paragraphs 8.6 and 8.7 of FRS 102 require disclosure of the significant accounting policies and judgements and key sources of estimation uncertainty used in preparing the amounts recognised in the financial statements.

In relation to estimation uncertainty, we have illustrated the uncertainty for the useful economic lives of tangible assets using a sensitivity as we consider this is information that would help users of the financial statements understand the judgements made by management. However, we note that these sensitivity disclosures are not explicitly required by paragraph 8.7 of FRS 102.

#### Commentary – Impact of COVID-19

Due to the pervasive impact of COVID-19 on some entities there might be critical judgements made in determining that the entity is a going concern. In such cases disclosures are expected to the extent that there is more judgment around the use of the going concern assumption and consideration of whether there is a material uncertainty to the disclosure.

The impact of COVID-19 might also result in critical estimates being made in the calculation of impairment of financial assets and non-financial assets like property, plant and equipment, goodwill, other intangible assets and inventories; recoverability of deferred tax assets; and fair valuation of investment properties (where entities have investment properties carried at fair value). Disclosure of assumptions made for such estimates would be required in the financial statements. Readers can refer to our dedicated web site which provides many useful resources and is constantly updated to reflect latest COVID-19 accounting developments.

	2021	2020
Raw materials and consumables	113	162

There is no significant difference between the replacement cost of work in progress and finished goods and goods for resale and their carrying amounts. Inventories are stated after provisions for impairment of  $\pounds 12,000$  (2020:  $\pounds 18,000$ ).

## 15.Debtors

	2021	2020
Trade debtors	2,053	1,467
Amounts owed by group undertakings	589	467
Other debtors	132	121
Prepayments and accrued income	61	54
	2,835	2,109

**4.4A** Trade debtors includes £205,000 (2020: £56,000) falling due after more than one year.

**11.42** Amounts owed by group undertakings are unsecured, interest free, have no fixed date of repayment and are repayable on demand.

#### **11.42** Trade debtors are stated after provisions for impairment of £96,000 (2020: £76,000).

## 4.4A Commentary

Where the amount of debtors due after more than one year is material in the context of total net current assets, it should be disclosed on the face of the balance sheet. If it is not disclosed on the face of the balance sheet it should be disclosed in the notes. These illustrative financial statements include disclosure of the amount in both the balance sheet and the notes, which is beyond the requirements of FRS 102. Although it is not required, where material, an entity could show the amount of prepayments and accrued income separately.

#### 16. Current asset investments

	2021	2020
Commercial paper	50	125
Short term deposits	725	613
	775	738

11.42Investments in commercial paper have fixed coupon rates between 8–10% (2020: 8– 10%) and mature in<br/>2020 (2019: 2020). They are measured at amortised cost.

**11.42** Investments in short term deposits have an original maturity of 3 months or less. At the balance sheet date the average maturity of the deposits was 1 month (2020: 2 months). The average interest rate was 0.7% (2020: 0.9%).

DV, 33.1A	The company is exempt from disclosing other related party transactions as they are with other companies that are wholly owned within the UK GAAP Holdings Limited group.		
	28. Controlling parties		
33.5	The immediate parent undertaking is UK GAAP Intermediate Holdings Limited.		
33.5, SI 2008/410 4 Sch 8,9	The ultimate parent undertaking and the smallest and largest group to consolidate these financial statements is UK GAAP Holdings Limited. Copies of the UK GAAP Holdings Limited consolidated financial statements can be obtained from the Company Secretary at New GAAP Towers, 3 The Square, London, WC2N 6RH.		
33.5	The ultimate controlling party is Mr M Soseley.		
	29. Events after the end of the reporting period		
32.10	On 28 March 2022, the company's factory in Carlisle suffered significant damage in a flood. The directors are still evaluating the impact of the damage, which is expected to be largely covered by the company's insurance policies. The maximum financial impact is the company's insurance excess of £150,000. Operations have transferred to other sites whilst repairs are carried out.		

# Appendix: UK GAAP standards

#### **Standards**

FRS 100 Application of financial reporting standards

FRS 101 Reduced disclosure framework - Disclosure exemptions from UK-adopted IFRS for qualifying entities

FRS 102 The financial reporting standard applicable in the UK and Republic of Ireland

FRS 103 Insurance contracts

FRS 104 Interim financial reporting

FRS 105 The financial reporting standard applicable to the micro-entities regime
